The Committee on Northern Population Research

Since its formation in 1977, the purposes of the Committee have been to:

(a) encourage northern population studies to be undertaken by universities, as well as government and other agencies;

(b) establish an informal clearing house of information pertaining to sources of northern demographic data;

(c) prepare the organization of workshops, conferences and other meetings on northern population problems to be held in the North, and to involve a large measure of direction and participation by the autochthonous people;

(d) plan and sponsor one or more longer-term research programs to be carried out, in the main, by university based researchers;

(e) submit to appropriate bodies, for their consideration, briefs or reports on matters pertaining to the collection, analysis or reporting of demographic data.

* * *

Le Comité de recherche sur les populations nordiques

Depuis sa création en 1977, le Comité s'est efforcé:

(a) d'encourager les agences gouvernementales et autres, ainsi que les universités à entreprendre des études sur les populations nordiques;

(b) d'établir un service d'information en démographie nordique;

(c) de préparer l'organisation de colloques, conférences et autres réunions portant sur divers problèmes qui touchent les populations nordiques; ces manifestations, tenues dans le Nord, doivent impliquer une participation active des autochtones;

(d) de planifier et parrainer un ou plusieurs programmes de recherche à plus long terme, ces programmes devant être menés principalement par des chercheurs universitaires;

(e) de soumettre pour considération aux organismes appropriés, des rapports ou des résumés ayant trait à la collecte, à l'analyse et à des compte rendus de données démographiques.

Members of the Committee on Northern Population Research / Membres du Comité de recherche sur les populations nordiques

Robert M. Bone, Professor, Department of Geography, University of Saskatchewan, Saskatoon (Saskatchewan). Chairman.

Kenneth de la Barre, Deputy Executive Director, Katimavik, Montreal (Québec). Secretary and Co-ordinator.

Jacques Gagnon, Directeur, Service de production et de soutien, Statistique Canada, Ottawa.

Colin Heartwell, Chief, Economic Research and Planning Branch, Government of Yukon, Whitehorse (Yukon).

Ralph Joyce, Statistician, Bureau of Statistics, Government of the Northwest Territories, Yellowknife (N.W.T.).

William B. Kemp, Senior Science Advisor for Makivik Corporation (Montreal), and Professor at the Department of Geography, McGill University, Montreal (Québec). Vice-Chairman.

* Ginette Lachance-Brulotte, Agent d'études sociales, Environnement Canada, Bureau de la Baie James et du Nord québécois, Ste-Foy (Québec).

* Jacques Légaré, Directeur, Département de démographie, Université de Montréal, Montréal (Québec).

* Doug Munroe, Senior Analyst, Products Administration, Petro Canada, Calgary (Alberta).

Robert W. Reid, Chief, Forecasting and Analysis Division, Northern Economic Planning Directorate, Department of Indian Affairs and Northern Development, Ottawa (Ontario).

Norbert Robitaille, Professeur, Département de démographie, Université de Montréal, Montréal (Québec).

Donat Savoie, Conseiller scientifique sur le Nord, Politique et coordination du Nord, Ministère des Affaires indiennes et du Nord, Ottawa (Ontario).

Peter Schledermann, Executive Director, Arctic Institute of North America, University of Calgary, Calgary (Alberta).

Andrew Siggner, Head, Regional and Social Economic Section, National Energy Board, Ottawa (Ontario).

INTRODUCTION

"Research in the sciences ... is fundamental to developments in technology, human relationship and welfare.... Fundamental to research is bibliography". (1)

I - Purpose and Selection Criteria

The Committee on Northern Population Research's effort to provide a systematic record of scientific, technical, and general publications concerned with social demography in northern Canada began in 1978 with the publication of Northern Population Bibliography - Canada* and continued in 1982 with the publication of Northern Population Bibliography - Canada II.**

The present bibliography focuses on population related material concerned primarily with labour, employment and training issues in the Canadian North. A limited amount of material has been included from Alaska, and a few other areas, where it is felt they are directly related to the purposes of the bibliography.

It is intended this publication will serve as a practical working tool for researchers, administrators, and teachers whose interests or responsibilities concern the northern populations of Canada.

In keeping with the purpose of this project, the subject matter contained in the bibliography covers a wide range of scientific disciplines. More specifically, this bibliography reflects the extensive literature that describes the economic impacts of large energy and mineral extraction projects, particularly as they affect the training and employment of northerners. A number of general studies have been included where they contribute to a broad understanding of the regions or communities impacted by the projects.

Of particular interest is the wide range of literature dealing with co-operatives as a form of commercial and social organization which has proven to be a useful mechanism for training and employing native northerners. In addition a substantial number of reports have been included that are concerned with specialized training programs, and different terms and conditions

* Out of print.

** Available at the Committee on Northern Population Research, Département de démographie, Université de Montréal, C.P. 6128, Succ. A, Montréal, Qué. H3C 3J7.

of employment which have been developed by industry specifically for northern Canada.

The preparation of this bibliography was immeasurably assisted by the significant expertise, and automated bibliographic resources of the Arctic Institute of North America's Arctic Science and Technology Information System (ASTIS) located at the University of Calgary.

Continued cooperation between the Committee and ASTIS has resulted in the production of the bibliography in a format which, it is hoped, will be most appropriate for the needs of a wide variety of users. Accessibility to the information in this bibliography will be further enhanced because all the documents referenced have been included in the ASTIS bibliographic data base which provides printed and online information retrieval services.

II - Scope of the Bibliography

The literature covered in this bibliography, numbering almost five hundred listings, spans the period from 1970 and earlier, to 1983. The breakdown, by various periods is as follows:

Year	Number of listings
Pre-1970	78
1970	9
1971	11
1972	26
1973	26
1974	24
1975	36
1976	30
1977	43
1978	55
1979	35
1980	38
1981	39
1982	28
1983	6
No year (serials)	11
Total:	495

This bibliography's primary area interest can be described by drawing a "space line" on a map of Canada which includes both the Territories, and the northern parts of all provinces, except the Maritimes. In general, the geographic areas conform to the regional sections of Canada included in the later editions of the Arctic Bibliography.

The breakdown of listings pertaining specifically to the main geographic areas is:

Main area	Number of listings
Canada general	53
Canadian provinces	120
Canadian Arctic (i.e. both Northwest Territories and Yukon)	66
Northwest Territories	213
Yukon	87
Alaska	15
Other	3
Total:	557*

Literature covered includes material published in both official languages: approximately five per cent of the listings are in French or English and French. About one per cent are published in Inuktitut.

The bibliography is in two sections: a register, and indexes by subject, geographic area, and author. The register is numbered in ascending order as processed by ASTIS. The register provides the document citation and abstract.** Most of the listings have abstracts included. The indexes are cross-referenced to the register numbers.

Those wishing to obtain documents cited in the bibliography should first contact their local research libraries, or the publisher of the document. If this approach is unsuccessful, the document may be obtainable from the location where it was indexed by ASTIS. This is indicated by a code on the last line of the citation, preceeding the abstract. These codes are explained under Location Codes.

---

* Some publications have more than one area code.

** ASTIS generally follows the ISBD(G) format for annotated texts.

The indexing included multiple entries under author, subject, geographic headings and, wherever possible, reference to specific communities. Each listing was indexed under an average of about four subject headings, two geographic and two author headings.

III - Appreciation

The searching for and preparation of listings began in the Spring of 1982 and was essentially completed by the end of February 1983. Completion of the project in such a period was made possible only by the help of many people. In particular a debt of gratitude is acknowledged to Denise Harvey who was the working heart of the project, and to Lynda Howard of Dome Petroleum Limited who contributed material for the bibliography. Allice Legat, research and administrative assistant to the Native and Social Issues Program of the Arctic Institute, also collaborated in the production of this bibliography. Collection of these bibliographic materials formed the first phase of a major study of native employment training programs in Canada's North, co-ordinated by Frances Abele, research associate of the Arctic Institute of North America. Funding for subsequent phases of this study has been provided principally by the Donner Canadian Foundation. It also should be stated that without the expert advice and cooperation of Ross Goodwin and the ASTIS staff, the project could not have proceeded in such a timely and efficient manner.

There is no claim made, of course, that this publication is a comprehensive listing of material dealing with the subject areas of this bibliography. However, it does represent the Committee on Northern Population Research's first effort to locate and describe the broad range of existing literature, and sources of information, concerned with labour force, employment and training practices and other related matters in northern Canada. Undoubtedly the present bibliography contains errors, and important omissions will have occurred. It would be appreciated if readers would draw these to our attention.

K. de la Barre

Kenneth de la Barre
Editor and Co-ordinator
Committee on Northern Population Research

INTRODUCTION

"La recherche scientifique... est essentielle au progrès dans les domaines de la technologie, des relations humaines, de la santé et même des arts. La bibliographie est essentielle à la recherche". (1)

I - Objectif et choix des caractéristiques

L'effort du Comité de recherche sur les populations nordiques en vue d'élaborer un index systématique des publications scientifiques, techniques et générales traitant de la démographie sociale du Nord canadien, a débuté en 1978 par la publication de la Bibliographie sur les populations nordiques canadiennes", et s'est poursuivi en 1982 par la publication de la Bibliographie sur les populations nordiques canadiennes - II**.

La présente bibliographie met l'accent sur les publications traitant surtout de la main d'oeuvre, de l'emploi et de la formation dans le Nord canadien. Certains matériaux concernant l'Alaska et quelques autres régions y ont été intégrés dans la mesure où ils contribuaient à en atteindre l'objectif.

Cette publication a été conçue pour servir d'outil de travail aux chercheurs, aux administrateurs et aux professeurs qui s'intéressent aux populations nordiques ou assument des responsabilités s'y rattachant.

En accord avec le but du projet, le contenu de la bibliographie couvre un large éventail de disciplines scientifiques. Il reflète, plus précisément, l'ensemble considérable de documents qui décrivent les effets, sur l'économie, des méga-projets d'extraction minière, en particulier ceux qui se répercutent sur la formation et l'emploi des populations nordiques. Un certain nombre d'études générales ont été incluses lorsqu'elles ajoutaient à la connaissance des régions ou collectivités touchées par les projets.

Les nombreuses publications traitant des coopératives en tant que forme d'organisation sociale et commerciale présentent un intérêt particulier du fait que les coopératives se sont révélées un mécanisme utile pour former

les autochtones du Nord et leur fournir de l'emploi. En outre, nous avons inclus un nombre substantiel de rapports traitant de programmes de formation spécialisée, élaborés par l'industrie à l'intention du Nord canadien, et des conditions d'emploi qui y prévalent.

La grande compétence et les ressources bibliographiques informatisées de l'Arctic Science and Technology Information System (ASTIS) de l'Arctic Institute of North America, situé à l'université de Calgary, ont apporté à la préparation de cette bibliographie une aide incommensurable.

La collaboration entre le Comité et l'ASTIS a permis de produire cette bibliographie dans un format qui, espère-t-on, répondra le mieux aux divers besoins de nombreux utilisateurs. Tous les documents répertoriés ayant été entrés dans la base de données bibliographiques de l'ASTIS, l'accès à l'information sera d'autant plus aisé que l'on peut consulter cette base de données en mode direct ou différé.

II - Portée de la bibliographie

La matière traitée comporte près de 500 entrées et couvre la période de 1970 (et antérieurement) à 1983. La répartition des entrées par période est la suivante:

Année	Nombre d'entrées
jusqu'à 1970	78
1970	9
1971	11
1972	26
1973	26
1974	24
1975	36
1976	30
1977	43
1978	55
1979	35
1980	38
1981	39
1982	28
1983	6
(Périodiques) sans date	11
Total:	495

La bibliographie porte surtout sur une région que l'on peut définir en traçant, sur la carte du Canada, une "ligne de démarcation" incluant à la fois les Territoires du Nord-Ouest et la partie nordique de chaque province, les Maritimes exceptées. En général, l'aire géographique correspond aux régions canadiennes incluses dans les plus récentes éditions de l'Arctic Bibliography.

Le nombre d'entrées se rapportant expressément aux principales régions se lit comme suit:

Régions	Nombre d'entrées
Le Canada	53
Les provinces canadiennes	120
L'arctique canadien (Territoires du Nord-Ouest et Yukon)	66
Les Territoires du Nord-Ouest	213
Le Yukon	87
L'Alaska	15
Autres	3
Total:	557 *

La matière traitée comporte des documents publiés dans les deux langues officielles: environ cinq pour cent des entrées sont en français, ou en anglais et en français; deux pour cent environ sont rédigées en Inuktitut.

La bibliographie se divise en deux parties: un registre, et trois index (matières, régions géographiques, noms d'auteurs). Le registre est numéroté dans l'ordre croissant programmé par l'ASTIS. Il indique l'adresse bibliographique et un résumé des documents.** Les index renvoient à la numérotation du registre.

Les lecteurs désireux de se procurer les documents cités dans la bibliographie devraient s'adresser d'abord à leur bibliothèque locale ou à l'éditeur. Si ces démarches sont infructueuses, ils peuvent obtenir le document à l'adresse mentionnée dans l'index de l'ASTIS et indiquée par un code à la dernière ligne de la notice bibliographique, juste avant le résumé. Ces codes sont expliqués sous la rubrique Codes de localisation.

---

* Certaines publications comptent plus d'un code de localisation.

** Pour les textes annotés, l'ASTIS se conforme généralement au format de l'ISBD(G).

Les index incluent des entrées multiples répertoriées par nom d'auteur, par matière et par région géographique; on a ajouté aussi souvent que possible une référence aux collectivités. Chaque entrée paraît en moyenne sous quatre matières, deux régions géographiques et deux noms d'auteurs.

III - Remerciements

La recherche et la préparation des entrées ont été entreprises au printemps 1982 pour s'achever fin février 1983. L'exécution du projet en un si court laps de temps n'a été possible qu'avec l'aide de nombreuses personnes. Nous témoignons en particulier notre gratitude à Denise Harvey, qui a été l'âme du projet, et à Lynda Howard de Dome Petroleum qui a fourni des matériaux pour la bibliographie. Allice Legat, adjointe à la recherche et à l'administration du Native and Social Issues Program de l'Arctic Institute a également contribué à la production de la bibliographie. La collecte de ces matériaux bibliographiques constitue la première phase d'une importante étude sur les programmes de formation de la main-d'oeuvre autochtone de l'Arctic Institute of North America. Des subventions ont été accordées pour les phases ultérieures de cette étude, principalement par la Fondation canadienne Donner. Mentionnons enfin que, sans les avis judicieux de Ross Goodwin et la collaboration du personnel de l'ASTIS, le projet n'aurait pu être mené à bien avec autant de rapidité et d'efficacité.

Nul ne prétend, naturellement que cette bibliographie répertorie tous les matériaux traitant des matières qui la composent. Elle témoigne cependant du premier effort du Comité de recherche sur les populations nordiques pour localiser et décrire les nombreux documents et sources de renseignements sur l'emploi, la main-d'oeuvre et la formation dans le Nord canadien ainsi que sur des sujets connexes. La bibliographie comporte sans doute des erreurs, sinon des lacunes importantes. Nous apprécierions que nos lecteurs les signalent à notre attention.

The outlook : Alaska natives and their careers / Appleton, R. Kowaluk, B. [Illustrator].
[Anchorage : ANU Press, c1975].
76p. : ill. ; 24cm.
(ANU Press book, no. 22)
(Native Alaskana series)
Index.
ACU

Presents a cross section of successful Aleut, Inuit and Indian people in a variety of jobs in Alaska. (ASTIS)

280
Native people and mining : the opportunity for an untapped resource / Lazore, G.
[Ottawa : Department of Energy, Mines and Resources, c1977].
viii, 22p. : maps (part. fold.), tables ; 25cm.
(Mineral bulletin, MR 171)
ISBN 0-660-01168-9
References.
ACU

Increasingly, jobs within the mineral industry remain vacant at a time when native peoples, often living adjacent to mineral developments, suffer from the effects of high unemployment in communities deeply rooted in poverty. By fostering conditions within the mineral industry which would make employment more attractive to Indian and Inuit peoples, a substantial contribution could be made toward solving not only the manpower issue which industry faces but the problem of poverty within native communities as well. ... This report tries to identify the types of obstacles which currently hinder native employment and suggests to all interested parties how these can be overcome. (Au)

426
Arctic petroleum development : impact and issues for northern communities / Keith, R.F. Fischer, D.W.
(Arctic land use issues. Contact, v. 8, no. 4, Nov. 1976, p. 117-127)
ACU

Discusses the impact of petroleum exploration on the native communities, particularly on the following issues: 1) technological - concerned with drilling, pipelines, oil clean-up under ice, 2) environmental - dealing with waste disposal, effects on fish and wildlife, 3) economic - effects on prices, interest rates, industry, labour, markets and investments, 4) social - concerned with health and welfare, education, native employment, and 5) political - dealing with petroleum exports, foreign ownership and participation, government in the Territories. Also points out the fact that until the native land claims are settled the North will remain without economic or political strength. (ASTIS)

639
An act to provide for the establishment of an Indian-Eskimo Employment Authority = Loi prevoyant la creation d'une commission d'emploi des Indiens et des Esquimaux / Canada. Parliament. House of Commons.

[4]p. ; 27cm.
(Bill - Canada. Parliament. House of Commons. 26 Elizabeth II, 1977, C- 294)
Text in English and in French.
ACU

Provides a mechanism whereby representatives of Indian and Inuit people can give urgent attention to unemployment among adult Indian and Inuit males. (ASTIS)

1880
[At the crossroads : Proceedings -] Northern Resources Conference, 4th, Whitehorse, Y.T., April 5-7, 1972 / Northern Resources Conference, 4th, Whitehorse, Y.T., April 5-7, 1972. Whitehorse, Y.T. Chamber of Commerce [Sponsor]. B.C. and Yukon Chamber of Mines [Sponsor].
[S.l. : s.n., 1972? (Whitehorse : Yukon Publications)].
xv, 151p. : ill. (part. col.) : 25cm.
ACU

Examines in detail some of the factors which affect northern development in all its aspects: economic, social and political. Non-renewable energy resources, oil and gas, geology, human resources , government policy, and transportation needs are the major areas of discussion. A list of delegates is available at the end. (ASTIS)

1899
Yukon on the move : [Proceedings] - Northern Resources Conference, 5th, Whitehorse, Y.T., October 22-24, 1975 / Northern Resources Conference, 5th, Whitehorse, Y.T., October 22-24, 1975. Whitehorse, Y.T. Chamber of Commerce [Sponsor]. B.C. and Yukon Chamber of Mines [Sponsor].
[S.l. : s.n., 1975? (Whitehorse : Yukon Press)].
x, 118p. : ill., maps, photos. ; 28cm.
ACU

Discusses the general economic development of the Yukon with particular emphasis on the problems of mineral development, energy resources, transportation, human resources, agriculture, tourism, and wildlife resources. A list of delegates is available at the end. (ASTIS)

2364
A curriculum in renewable resource technology for the Northwest Territories, with an accompanying rationale and recommendations for implementation / Kelsall, J.P. Kelsall, J.I. Keller, R.A. N.W.T. Renewable Resources Management Advisory Committee [Sponsor].
[S.l. : s.n.], 1977.
165p. ; 28cm.
ACU

This report presents a curriculum in renewable resources technology, especially designed for the Northwest Territories with accompanying course outlines, each having references and suggested teaching hours. The curriculum is designed to be field-oriented with an approximate ratio of 40% field time to 60% classroom time. The curriculum is accompanied by a comprehensive report providing a rationale for such teaching in the north, selection criteria for enrolling students, a forecast of the students currently and potentially interested in the program, and a discussion of a proposed student/apprentice approach to teaching the curriculum. 3310
The development of an employment policy for Indian, Inuit and Metis people / Canada. Employment and Immigration Canada (Commission). Canada. Task Force on Manpower Services to Native People.
[Ottawa] : Employment and Immigration Canada, [1976?].
25,25,38p. : tables, maps ; 35cm.
Text in English and in French.
Findings and conclusions of the Task Force on Manpower Services to Native People.
ACU

The findings and conclusions of the Task Force on Manpower Services to Native People are presented in this text with a view to providing a stimulus and some information to the very healthy debate which is currently under way in Canada concerning ways of reducing the unemployment rate amongst Native people. After presenting some data on the Indian, Metis and Inuit labour force, the discussion paper analyzes the factors which, over the years, have contributed to placing Canadians of Indian and Inuit ancestry in a most difficult economic situation. An attempt is made throughout this text to restrict the discussion as much as possible, to issues which fall within the jurisdiction of the Canada Employment and Immigration Commission. (Au)

Economic, social and planning requirements for northern communities / Linn, H.D. Stabler, J.C.
[Saskatoon] : Dept. of Mineral Resources, Saskatchewan Geological Survey, 1978.
iv, (various pagings) : ill., tables ; 28cm.
(Miscellaneous report - Saskatchewan. Dept. of Mineral Resources, no. 78- 1)
Cover title.
References.
ACU, SSU

... Internal socio-economic and physical problems unique to single-industry communities may inhibit orderly resource development in isolated regions. One of the more significant of these problems is related to labour turnover and an apparent dissatisfaction with life in resource communities. The purpose of this research was to study single-industry communities in isolated regions of Canada in order to identify and evaluate the problems and to suggest ways to overcome them. A sample of communities was selected for an empirical study which reflected a variety of considerations. The communities had to be related to the development of a resource. The sample had to be small enough to be studied within the time and monetary constraints of the project and yet large enough to contain a good cross-section. The sample included eleven communities from Labrador to the British Columbia coast. Some of the communties selected were old and some were new. Some were poorly planned while others were well-planned. Finally, the communities selected varied in size, complexity and accessibility. ... (Au)

Tuktoyaktuk : a community study / Bachmayer, G.W. [et al].
[Calgary : University of Calgary, Faculty of Environmental Design, 1978].
132p. : ill, maps (part fold.) ; 29cm.
Bibliography: p.129-132.
ACU

... The purpose of the study is to assist the community of Tuktoyaktuk in achieving a socially and environmentally acceptable interface between the community and industry. To achieve this purpose we have the following objectives: a) to identify the effects which the residents of the community of Tuktoyaktuk feel that industry is having on their community b) to provide alternatives for dealing with these effects which reflect the views of people in the community. ... The study deals with such matters as community growth, housing, education, alcohol, water and waste and communications. (Au)

Impact of oil exploration work on an Inuit community / Kupfer, G. Hobart, C.W.
(Arctic anthropology, v. 15, no. 1, 1978, p. 58-67, tables)
References
ACU

The impact of oil exploration work by Gulf Oil Canada in the MacKenzie Delta on the Inuit people of Coppermine is analysed. Various segments of the community (i.e., the male workers, wives and children) and non-Inuit members of the community were interviewed in order to assess the effect of the work on the economy, social and family life and health of the community. Alaska economic outlook to 1985 / Teal, D.
Pistoli, L. Harrison, S.
[Juneau : Alaska Department of Labor], 1978.
ii, 37p. : ill., tables, graphs ; 28cm.
ACU

Alaska Economic Outlook to 1985 presents an overview of historical events influencing employment in Alaska, but its major purpose is to provide employment projections to be used as a planning tool. The authors realize that models of the economy, like the economy itself, are ever-changing and that projections are only as good as the information and judgement that form them. Beyond this, the projections' usefulness is largely determined by their presentation. ... (Au)

Yukon economic review / Y T. Economic Research and Planning Unit.
[Whitehorse] : Economic Research and Planning Unit, Government of Yukon, 1978- .
tables ; 28cm.
Quarterly.
Description based on issue for 3d qtr., 1978.
ACU

Provides statistical information on Yukon industry, housing, vital statistics, population changes, and economic indicators such as average weekly earnings, retail trade, motor vehicles, minerals, fuel, and visitors. (ASTIS)

11738
Alaska pipeline : social and economic impact on native people / Strong, B.S.
Ottawa : Indian and Northern Affairs, 1977.
80p. : maps, tables ; 28cm.
(ESCOM report, no. AI- 1)
Bibliography: p.73-80.
ACU

Reviews in detail the negative and positive effects of pipeline construction on the native population. Native employment in the construction industry, recruitment and training of native workers, and business opportunities for several Alaska Native Regional Corporations were some of the positive effects. On the negative side, there was an increase in family stress, a general rise in crime, alcohol and drug abuse, and an increase in inflation which was most strongly felt in remote communities. (ASTIS)

12424
Occasional papers (1974-1977) : native employment and futures / Petrie, M.K.
Ottawa : [s.n.], 1978.
iv, (various pagings) ; 28cm.
Cover title.
ACU

A collection of papers on the problems encountered in the employment of native peoples in the Canadian north, and a look at the future of northern employment. Some of the studies include community employment strategy and native people, a statement of hiring principles and native people, and factors affecting native employment north of 60 degrees. (ASTIS)

12459
Issues relating to employment in the north / La Rusic, I.E. Canada. Northern Social Research Division [Sponsor].
[Ottawa : Northern Research Division, DINA], 1976.
46 leaves : tables ; 29cm.
Bibliography: p.45-46.
ACU

Reviews of employment and labour statistics from N.W.T. and Quebec indicate a very limited potential for developing a northern economy based on wage labour. Successful native involvement in a wage economy depends on a symbiosis with the native subsistence economy of hunting, trapping and fishing. Discussions of native reaction to government efforts in providing job training are included. (ASTIS)

12645
Northern native employment in the Federal Public Service : an overview / Hunter (P. David) and Associates. Canada. Territorial and Social Development Branch.
[Ottawa] : Territorial and Social Development Branch, Northern Affairs Program, Dept. of Indian and Northern Affairs, 1975.
40 leaves ; 28cm.
References.
ACU

Discusses the attitudes of northern native employees towards employment in government service. Studies in detail the problem of job retention especially as it is applied to the native employee. Reviews the social and educational experiences of people who are employed in the government. Recognizes the importance of cooperation between the Public Service and northern communities in attempting to increase native participation in the Service. (ASTIS)

The trans-Alaska Gas Pipeline Project : an analysis of its impact on Alaska's workforce and population / Alaska. Dept. of Labor. Research and Analysis Section.
[Juneau] : Research and Analysis Section, Alaska Dept. of Labor, [1978?].
66 leaves : graphs, tables ; 28 cm.
Appendices.
ACU

This is a report on the economic impact expected to result from the construction of a trans-Alaska gas pipeline project. This study includes projections to 1983, two years after the project is expected to be completed. The data provided is limited to yearly industrial employment, workforce, and population projections both statewide and by seven regions within the State. (Au)

Economic development prospects in the Northwest Territories / Canada. Dept. of Regional Economic Expansion.
[Ottawa] : Government of Canada, Regional Economic Expansion, 1979.
23p. : map ; 28cm.
Cover title.
One of a series of reports on development prospects in the provinces, territories, and regions of Canada.
ACU

The physical and social differences among regions of the Northwest Territories suggest that a variety of approaches may be required to promote development: an emphasis on traditional activities, training and work rotation where the economic base is limited and previous exposure to wage economy minimal; development of a transportation infrastructure to support development where major resource development potential occurs; and strengthening of the local economy where major income and population centres now exist. The territorial economy has a unique duality. There is a developing modern economy based on government and mining which, in terms of its effects, is concentrated in the larger centres .... The traditional economy of hunting, fishing, and trapping is crucial to many small settlements. The major factor in development for the Northwest Territories will be the linking of the modern economy and the traditional economy without destroying the latter and eliminating one of the options presently available to residents. ... Development of a stable social unit at the Black Angel Mine / Noakes, P.J.
(CIM bulletin, v. 71, no.790, Feb. 1978, p. 52-59, photos., tables)
ACU

Remote and isolated ... the Black Angel mine in Greenland had to create a warm social environment which would help attract and retain a stable work force of miners and support staff. ... the potential costs of personnel turnover become critical factors in the success or failure of the mining venture. ... The

skilled work force was assured with training courses of four months .... The stable social unit was assured by plans the primary attribute of which had to be flexibility. The accommodation changed from shared accommodation with communal washroom facilities to single accommodation with private washroom facilities. A recreational director was hired to help the workers make use of elaborate recreational facilities. A closed-circuit TV and radio system was installed .... The liquor rules were changed and the mine manager became a licensed innkeeper .... The result is a relatively stable work force. Some 35% of the people have more than two years' service with the company, Greenex A/S, and some 62% complete 10 months of service. (Au)

(Erde, v.110, no. 4, 1979, p. 275-298, figures, photos.)
References.
Text in German.
ACU

... Mining development in the Mid North/Moyen Nord took place in four phases each distinguishable by nature of deposit, mining and production techniques as well as degree of government influence, and each producing a different type of mining settlement. The given conditions of mining, the changes in population and settlement, the transport situation and the functional significance of selected mining settlements in the 30es, 50es and 70es are examined. ... The type of the Canadian Company Town is illustrated by the company owned mining complex Eldorado with varied housing opportunities, all necessary services and fully developed recreation facilities. ... After a series of investigations several government departments decided on planning Uranium City as a New Town in the centre of a number of mines. ... At present, due to more precise estimates of exploitation time, planned non-permanent mining settlements are being developed, Rabbit Lake Mine being a leading example. As the work force operates long hours and is replaced completely every week it has become possible to reduce the services to an absolute minimum. These settlements represent mere outposts of the southern ecumene. Their influence on the development of the North is even less than that of the earlier mining settlements. (Au)

Problems of Eskimo relocation for industrial employment : a preliminary study / Stevenson, D.S.
Ottawa : Northern Science Research Group, 1968.
ix, 25p. : map ; 28cm.
(NSRG - Canada. Northern Science Research Group, 68- 1)
(North of 60)
ACU, SSU

... research was conducted during 1967 into the possible reasons for variable success in relocating Eskimo families to centres of industrial employment. A number of interim conclusions have been drawn. Where the migrants lack comprehension of the informal rules governing behaviour that is acceptable in southern communities, and where attempts are made by the migrants to retain former life patterns, assimilation and/or acceptance into the community is seriously retarded. Further, although technical training and grade-school education are necessary for migration, by themselves they are not sufficient for successful adjustment to community life-styles. The problem lies partly in community awareness of the migrant, and partly in the more insistent demands by the community for conformity of the migrant to 'normative' behaviour. In short, because the migrant is unaware of the informal rules governing acceptable behaviour in southern communities, and because his only recourse is to assume that the actual behaviour he observes is acceptable, he models his own behaviour accordingly and, in consequence, is rejected by the community. (Au)

A cultural geography of northern Foxe Basin, N.W.T. / Crowe, K.J.
Ottawa : Northern Science Research Group, 1969.
xii, 130p. : ill., figures, maps, photos., tables ; 28cm.
(NSRG - Canada. Northern Science Research Group, 69- 2)

"This report was originally submitted as a masters thesis in geography at the University of British Columbia, ..."
Bibliography: p.119-126.
ACU, SSU

... This study attempts to build upon existing knowledge of northern Foxe Basin, examining the symbiosis of people and land throughout known history, with locations as the dependent variable. Two principal problems provided the themes of the thesis. The first is continuity in size and shape of settlement during changes in the physical and cultural environment. The second is the effects of complete social and spatial change since 1966. The region has marked characteristics and long history. It is an excellent theatre for the study of interaction between people, their culture and their regional resources. Although it is important that the region be studied as a contribution to knowledge, there is a need for the application of social science to regional problems. ... (Au)

Cominco's Arvik Mine.
Ottawa : Canadian Arctic Resources Committee, 1979.
4p. : 36cm.
(Arctic seas bulletin, v. 1, no. 9, Nov. 1979)
ACU

On 5 November 1979, Cominco Ltd. announced that it would be proceeding immediately with the development of the "Polaris" zinc-lead deposit of Arvik Mines Ltd., at a cost of approximately $150 million. The deposit is located on Little Cornwallis Island in the High Arctic, approximately 60 miles northwest of Resolute and 90 miles southeast of the magnetic North Pole .... It contains estimated ore reserves of 23 million metric tons, grading 14.1% zinc and 4.3% lead. ... In terms of metal production, the mine will be the eleventh largest zinc-lead producer in the world. Production is expected to commence early in 1982 and to continue for over twenty years. The Cominco press release stated that "Concentrates will be shipped in the Canadian ice-breaking bulk carrier, M.V. Arctic, as well as in other Canadian or European ice-strengthened vessels. Contracts have been signed for the treatment or sale of the total output of the mine." The go-ahead decision on Arvik was greeted with varying degrees of enthusiasm. ... Inuits are once again being forced to react to a development proposal that has been given the go ahead. ... (Au)

Performance of native trainees in an apprenticeship training program / Hobart, C.W.
(Canadian journal of native studies, v. 1, no. 1, 1981, p. 33-58, tables)
References.
ACU

This paper reports on an evaluation study of a training program designed to prepare northerners, predominantly native northerners, as gas plant and gas pipeline operators. Specifically it describes the structure of the training program, the recruitment and orientation procedures for trainees and supervisors, and the response to the program of the trainees, as reflected in their performances and their interview responses, and in the interview responses of co-workers and supervisors. The reactions of the co-workers who were typically responsible for the actual training are reported as well. (Au)

A review and analysis of perceptions concerning success in renewable resource development projects in the Mackenzie Delta area / McCracken, C. Canada. Northern Social Research Division.
[Ottawa : DIAND, 1978].
56p. ; 28cm.
Appendices.
Bibliography : p.56.
ACU

The primary objective of the Canadian Government in the North is to assist the residents to achieve a higher standard of living, quality of life and equality of opportunity through methods which are compatible with their preferences and aspirations. Development projects should be based on the economic and social needs of a community interwoven into the cultural fabric of the people. ... As a result of the Berger Inquiry, emphasis has been placed on renewable resource development North of 60. The Inquiry offered the residents the opportunity to voice their opinions concerning development. ... One of the resulting recommendations was that while some larger scale non-renewable resource development was viable, this activity should exist 'side-by-side' with traditional renewable resource activities. ... three renewable resource projects in the Mackenzie Delta [were] studied. The purpose of this case study is to review and analyse perceptions concerning the success of these projects. ... In the first case information will be gathered concerning whether the projects are in fact considered a success and the reason for this decision. ... In the second case, there may be certain characteristics that have contributed to the success of the projects or that have created problems. ... To achieve these ends a longitudinal study was conducted with particular emphasis placed on workers' attitudes, satisfaction and the degree of integration of work activities with participation in traditional home, community and economic activities. The three projects considered are the Aklavik Fur Cooperative, the Inuvik Serving Centre and the Nanook Fur Cooperative in Tuktoyaktuk. The aim of the investigator was to interview as many individuals along the lines of production to elicit views concerning this issue. The result of the study is a list of perceptual principles of success that the respondents felt were important factor to be considered in these and other renewable resource development projects. ... Methodology for the estimates of labour force activity in Yukon / Y.T. Economic Research and Planning Unit.
[Yellowknife : Economic Research and Planning Unit, Government of Yukon, 1979].
iii, 11p. : tables ; 28cm.
ACU

The Labour Force data was developed in response to a rapidly increasing need by government and private interest for some estimate of employment and labour force activity. The procedure used in calculating Labour Force and employment in Yukon is as follows: 1. Obtain an estimate of working aged population (15 years of age and over) from Yukon Health Care records. 2. Adjust the Health Care data to eliminate the known biases. 3. Using the labour force participation rates of Northern B.C. as a proxy for Yukon and apply these rates to Yukon's working population. This provides an estimate of labour force. 4. Estimate employment in Yukon from the Yukon Employment Survey. 5. Derive unemployment by subtracting the employment from the labour force. Every effort is made to remove errors in the data but some possible errors still exist. The possible errors include: a) possible inaccuracies in Health Care data. b) possible distortions in the Labour Force participation rates in the structure of northern B.C.'s economy is significantly different. c) possible errors in the Yukon Employment survey resulting from the use of a voluntary sample survey. Text written in French and English.
ACU

Statistics Canada published in June 1974 its first official population projections for Canada, the provinces and territories in response to the growing public demand for such information. In accordance with its policy, these projections are now revised in the light of the 1976 Census results and the recent demographic trends in the country. This report presents the second official series of demographic projections which supersede those published in the preceding volume. ... Four alternative sets of projections are included in this report to cover the plausible range of variation in the factors governing the future growth of population. In addition, some special purpose projections are included to aid demographic analysis and policy studies.

En juin 1974, Statistique Canada publiait ses premieres projections demographiques officielles pour le Canada, les provinces et les territoires, en reponse a la demande croissante du public pour ce genre d'information. Conformement a sa politique en cette matiere, le Bureau a revise ces projections a la lumiere des resultats du recensement de 1976 et des recentes tendances demographiques enregistrees au Canada. Le present rapport contient la deuxieme serie officielle de projections demographiques, qui se substitue a celle du precedent volume. ... Le rapport comprend quatre series de projections qui illustrent tout l'eventail des variations plausibles des facteurs regissant la croissance future de la population. De plus, nous avons inclus quelques projections speciales qui peuvent etre utiles a l'analyse demographique et aux etudes de politiques. ... (Au)

Literature cited: p.310-311.
ACU, OON

This report presents the results of a study to determine and describe the current and future social and economic setting of northern Manitoba. Specifically, the objectives of the study are to assess and explain the dynamic interactions which comprise the socio-economic system of northern Manitoba, and to project relevant variables within that system to the years 1981, 1986, and 1991. The outcome of the study provides the basis upon which an assessment of the impacts of the proposed Polar Gas Project may be undertaken. The study was conducted during the period December, 1977 to April, 1978 .... Estimates of future change in relevant variables are made and future employment, population and labour force levels are projected. ... The findings ... demonstrate that social and economic disparities exist in northern Manitoba, and that moderate population and economic growth will occur in the industrial north, while rapid population growth will characterize the remote north. v, 31p. : ill., tables ; 30cm.
(Component study - Ontario. Northwestern Ontario Manpower Adjustment Study, no. 2)
Appendices.
ACU

The labour force of Northwestern Ontario as a whole manifests a clear pattern of growth. It grew at an average annual rate of 1.4 percent between 1961 and 1971, and is expected to grow at an average annual rate of 2.3 percent between 1971 and 1981. However, between 1978 and 1981 the rate is projected to drop below 1.0 percent. The Region will thus enter the 1980's with a labour force whose rate of growth has sharply declined. Striking as this larger trend is, it means little unless it is possible to study the smaller trends that make it up. ... The purpose of this report is to answer these questions. It considers three main sources of change in the labour force: the education sector, net migration, and "residual" change. ... (Au)

(Component study - Ontario. Northwestern Ontario Manpower Adjustment Study, no. 5)
Appendices.
ACU

This report evaluates the trends in the growth of the labour force in Northwestern Ontario until the year 1981. The distinctive feature of this analysis is its recognition that historical data are the end-product of many complex interactions, and that meaningful projections can only be made when the interactions that generate the observable facts are understood. For this reason, rather than present "straight-line" or "fixed-coefficient" extrapolations of past data, this report identifies some of the factors underlying the growth of the labour force, and demonstrates their dynamic effects on this growth. Such an analysis is of practical value because the essential dynamic effects of these factors often persist in spite of many of the government actions that are conventionally undertaken to improve the growth trends in the labour force. By explicitly describing some of these complex interactions and their dynamic effects on the growth of the labour force, the analysis presented in this report should assist in understanding the response of the Northwestern Ontario Region to specific social, political, or economic changes, and also assist, when desirable, in designing government policies that can achieve long-term results. ... Traditional and modern sources of income in the Lancaster Sound region / Myers, H.
(Polar record, v. 21, no.130, Jan. 1982, p. 11-22, figures, tables)
References.
ACU

Northern Canadian natives wish to continue their traditional lifestyle by hunting, fishing and trapping. These feelings have, for example, been expressed at the recent Lancaster Sound Regional Study workshops by the native residents of Grise Fiord, Resolute, Arctic Bay and Pond Inlet, in spite of pressure by government and industry for the Inuit to take up wage-earning employment. ... The weakness of traditional economy is the failure to realize sufficient cash income when compared with the southern-influenced formal economy. With increasing cash requirements a mixed economy has developed, characterized by Inuit participation in both traditional and wage-earning activities. ... Employment with non-renewable resource developers offers few long-term opportunities for northern peoples; once a project has finished, the main result may be seen to have been only disruptive, as once-employed people find it difficult to return to subsistence activities. It would seem sensible and desirable to maintain and encourage the renewable resource-based lifestyle to some extent, as a continuing part of northern support. (Au)

ACU

The impetus for this report was the observation that Inuit and Indian infants living in the Northwest Territories (NWT) had a much higher frequency of morbidity and mortality than did White infants. The objective of this report is to answer the question "Why such a difference?" The method used to try and answer this question was a prospective observational study of the question and first twelve months of life of all infants born in the Northwest Territories over a twelve month period. During this time information was collected describing the socio-economic and cultural environment of the infant and his family, his feeding practices and those of his family, his medical contacts for the purposes of preventive health care of diagnosis and treatment, his illnesses and, in some cases, the reasons for his death. [Statistical tables on employment are included.] (Au)

Also available in French under title: L'evolution et l'economie de la communaute du Delta.
ACU

... historical analysis shows that agents of cultural contact - the trading company and mission churches - focussed the activities of native Eskimo and Indian peoples upon the Mackenzie Delta. ... In 1950, trapping camps were evenly distributed throughout the Mackenzie Delta .... After the building of the new planned settlement of Inuvik the numbers of trapping camps diminished .... For the mid-sixties, a grouping procedure used to dichotomize "serious" and "part-time" trappers shows that a large proportion of the latter maintained trapping camps. Analysis of employment in Inuvik also shows a divided commitment to land and town. High income and high status jobs were occupied predominantly by white transient workers since they required skills and levels of educational achievement possessed by few native people. Though native people of Metis origin showed some success in employment, most Eskimos and Indians occupied more menial jobs. A comparison of employment in government and non-government sectors indicates that native involvement in the latter was growing, many native people in both sectors shifted jobs frequently, or between jobs and land-based activities. The town economy like the land economy showed signs of adaptation to the dual allegiance felt by native people to land and town. (Au)

This study examines average family income and income distribution as indicators of the standard of living of the people of the Yukon Territory and the Northwest Territories. ... income disparities between regions were great. ... Income inequalities among the different ethnic groups in the northern territories were also found to be great, and the evidence overwhelmingly suggested that Indian and Eskimo families had a much lower standard of living than those of people of other ethnic origins. ... The investigation ... revealed that there was a direct relationship between average earnings and the level of education .... This pattern may relate to the fact that the level of education attained by Indian and Eskimo workers was found to be extremely low. ... (Au)

The socio-economic implications of gold mine closure in the Yellowknife region / St. Pierre, M. Canada. Northern Economic Development Branch. Regional Planning and Manpower Section.
Ottawa : DIAND, 1972.
v, 65 p. : tables ; 28 cm.
(North of 60)
Appendices.
ACU

The purpose of the study was to analyse the major socio-economic problems that are likely to arise from a cessation of operations of gold mines in Yellowknife. ... it was found that there are three groups of people - home owners, older residents and the native people among the mining fraternity - who might be particularly confronted with special socio-economic problems as a result of the closing of the mines. Their problems might range from their inability to obtain ... employment in Yellowknife, to their unwillingness to move to another region in search of employment. For these people and others who will be unemployed with the closing of the gold mines in Yellowknife, their ability and/or willingness to make use of the Federal Government's special training, mobility and manpower adjustment programs may well be a solution to most of their unemployment problems. The socio-economic impact of non-renewable resource development on the Inuit of northern Canada / Mann, D. Inuit Tapirisat of Canada [Sponsor].
[Waterloo, Ont.] : University of Waterloo ; [London, Ont.] : University of Western Ontario, 1975.
94 p. : tables ; 28 cm.
(Renewable resources project reports - Inuit Tapirisat of Canada, v. 8)
(Impact of mining and hydroelectric projects and associated developments on arctic renewable resources and the Inuit)
Bibliography: p.83-94.
ACU

... There are few comprehensive studies of the impact of Caucasian or Kabloona society on northern native lifestyles. From discrete examples and case studies, this paper attempts to evaluate the impact of non-renewable resource development on the Inuit. ... [It is found that the widespread poverty and unemployment are largely due to rapid development.] ... It would be relatively simple to make ... recommendations for .... better education, housing, health facilities, and

greater employment opportunities .... These adjustments, however, are not solutions but "band-aids" modifying effects rather than causes of native problems. While easing some of the symptoms of cultural conflict they embody no long-term solutions. Rather, ... the natives must gain control over the northern social economy. ... Better programs for apprenticeship, education, and manpower mobility should be established for natives who want non-renewable resource wage employment. It is felt, however, that massive programs attempting to draw Inuit into the energy and mineral extraction industries are unwise given the short-run nature of these developments and associated, negative, social impacts. (Au)

Appendices.
Bibliography : p. 105-109.
Thesis (PhD) - University of British Columbia, Vancouver, B.C., 1969.
ACU

... The present study examines the job satisfactions, personal histories and performance ratings of workers in the specific environment of isolated work settings in the Canadian Arctic .... Results from each camp are analysed separately so as to provide answers to the following three problems: 1. The determination of overall differences between the fulfillment, [and] dissatisfaction across all workers. 2. The determination of differences between the need perceptions of successful and unsuccessful workers. 3. The determination of differences between the personal and occupational histories of successful and unsuccessful workers. Analyses regarding problem 1 showed that, in general, Esteem and Autonomy needs are the least fulfilled, that Esteem and Self-Actualization needs provide the most dissatisfaction and that Autonomy needs are considered to be the least important. Analyses regarding problem 2 showed that, in the two camps where valid performance ratings were obtained, the differences between the overall fulfillment and dissatisfaction scores of successful and unsuccessful workers were significant and in the predicted direction. Analyses regarding problem 3 showed there to be no significant differences between the personal histories of successful and unsuccessful workers. ... (Au)

Wage employment and its consequences in two eastern Arctic communities / Roberts, L.W.
Edmonton : University of Alberta, 1977.
3 microfiches : tables ; 10 X 15 cm.
Thesis - University of Alberta, Edmonton, Alta., 1977.
ACU

The effects of wage employment on the Inuit from two Eastern Arctic communities are investigated. Two aspects of the issue are studied: how the Inuit workers react to the on-the-job demands of oil exploration wage employment; and what effect the massive influx of wage employment is having on the home communities of native workers. Indian and Eskimo labour force projections to 1981, Northwest Territories / Mathurin, D.C.E.
[Ottawa] : DIAND, 1968.
ii, 24 p. : tables ; 28 cm.
Document not seen by ASTIS.
OMMNS

The objective of this study is to estimate the size of the Indian and Eskimo labour force of the Northwest Territories to 1981. Projections are derived through combining the estimated number of men and women of work age, with "assumed" participation rates. Paucity of data hindered the study's accuracy but probably the study presents a "reasonably" useful picture upon which policy decisions could be formulated. (LET)

Wage labour and skidoos / Moyer, D.S.
[St. John's? : Memorial University?, 1970?]
23 p. ; 28 cm.
(Folk, v. 14-15, 1972/73, p. 145-161, tables)
Also published under title: Wage income and skidoos: the non-productive significance of an Eskimo consumer item.
Paper presented at the Tenth Annual Meeting of the Northeastern Anthropological Association, St. John's, Nfld, May 7-9, 1970.
References.
ACU

This paper deals with the social consequences of skidoo ownership in an Eskimo community and with the relationships between wage income and skidoo ownership. ... In the discussion two analytical approaches will be employed. The first will focus on the individual strategies used in relationship to skidoos and to the earning and expenditure of wage income. The second will deal with the total social effect that results from the strategic choices made at the individual level. ... the choice to participate in the wage economy and the frequently subsequent choice to buy a skidoo has a significant impact on the social structure beyond the level of individual decision making factors. The total social effect of choices relates to the values maximized and the cumulative significance of completed choices. ... the choice to become involved in the wage economy, repeated many times, has significant effects on the whole social organization of the community as it is being shifted from a predominantly hunting base to a wage base. Furthermore, the significance of the shift is often not part of the individual's interpretation of the situation. (Au)

Industrial impact in the Canadian north / Brody, H.
(Polar record, v. 18, no.115, Jan. 1977, p. 333-339)
ACU

... This article is based on material contained in two papers, entitled 'Industrial impact' and 'An overview', presented at the [Berger] Inquiry ... in August 1976. ... Industrial employment ... has an impact on the distribution of income within a small community. ... [Inuit hunters share their catch with neighbours] Wage earners tend to regard it [money] as their own private property, and to spend it on their immediate families' personal needs. Consumer durable goods cannot easily be divided among neighbours. The shift towards a money economy thus creates a possibility for poverty that previously did not exist: those in want are more likely to stay in want, and substantial inequalities introduce themselves into native communities. It is possible, in an unequal society where the basis of wealth is not shared, for average per capita income to go up, while the number of households experiencing poverty is also increasing. (Au)

The effect of education on earnings in the Mackenzie District of northern Canada / Kuo, C.-Y.
[Ottawa] : DIAND, 1972.
v, 20 p. : tables ; 28 cm.
(North of 60)
Appendix.
References.
Also available in French under title: L'influence de l'education sur les gains dans le district du Mackenzie du Nord canadien.
ACU

... The primary purpose of this paper is to investigate if education plays a significant role on ethnic earnings in the Mackenzie District. ... multiple linear regression has been adopted to analyze major determinants of ethnic earnings in the District of Mackenzie. Formal education in elementary and secondary schools for Indians has significant influences on earnings. This effect would not be realized in the cases of Eskimos and Whites until they reached secondary school. In addition, the statistical evidence casts doubts on the effect of education on Metis earnings. However, university education and vocational training have much stronger impacts on earnings than formal education, since they lead directly to employment. ... the higher the proportion of Whites to total population in a settlement, the higher are the annual earnings of all workers, and particularly those of the indigenous

workers. This indicates the significance of southern influences on the earnings of northern indigenes. ... the substantial gaps in earnings between Whites and natives have been shown to be attributable to education, "openness", marital status and age structure of workers, as well as ethnic differences. The social context of economic change : a study of Eskimo boat management / Mayer, D.S.
(Human organization, v. 30, no. 1, Spring 1971, p. 11-24, figures, tables)
References.
ACU

This paper examines the social and economic consequences of wage employment on the capital maintenance practices of the Eskimos of Southampton Island. Using a comparative framework, the changes in boat management strategies created by the introduction of significant wage employment opportunities are examined. It is concluded that wage income has led to a differentiation between rights of usufruct and rights of ownership. Specifically, the categories of non-using owner and non-owning user have appeared for the first time. Further, the analysis indicates that kin relationship to the captain takes precedence over purely economic considerations in determining who will finance the boat as opposed to who will derive economic benefit from it. The impact of technology upon native people and their traditional pursuits / Naysmith, J.K.
[Ottawa? : DIAND?, 1972?].
[22] p. : tables ; 28 cm.
Bibliography : p. [22].
Paper presented at the seventh World Forestry Congress, Buenos Aires, Argentina, October 1972.
ACU

Two issues emerge from a consideration of the impact of technology upon native people. One is the effect that indiscriminate use of water, forest and land resources might have on the natural habitat and thus on those people who depend to some degree upon the "land" for their livelihood. The second is the challenge of providing native people with the opportunity to play a productive role in a technological society if that is their desire. ... in general the industrial sector recognizes its responsibility to minimize disturbance of the "land" and has demonstrated a willingness to work within sensible guidelines, which in some cases take the form of legislation and/or regulations. ... Most native people entering the labour force find that they are at a disadvantage when competing with non-native people, due to a lack of formal education or technical training. Considerable empirical evidence indicates that the possibility of native employees moving up through an organization and filling technical, administrative or supervisory positions is limited. On the other hand where positive steps have been taken to provide native people with formal instruction and technical training the result is indeed gratifying to both the employer and employee. It follows that a more rigorous approach to on-the-job training and technical instruction is required, both by government and the private sector, if a broader range of employment opportunities is to be made available to native people. Diagnosis of behavior of Eskimo students during prevocational training / McDowell, M.E.
Ames, Iowa : Iowa State University, 1973.
110 p. : tables ; 28 cm.
Appendices.
References.
Thesis (Ph.D.) - Iowa State University, Ames, Iowa, 1973.
ACU

Vocational education is considered a prime means of helping the Canadian Eskimo adjust to the pace of economic and social change and participate in a meaningful way in the developments occurring in Northern Canada. This study is concerned with a program of prevocational education .... To achieve effective procedures for guiding the individual growth of students, a diagnostic device was developed and validated to provide a guide for teachers' observations. Incidents of student behavior considered critical to performance during training and later on the job were observed, recorded, and classified by teachers ... Development and subsequent use of the observation record were considered a useful technique for in-service education of the teachers in that attention was focused on the student: understanding ... However, development and/or use of an evaluation device using an observational technique must be accompanied by observer-rater training to ensure that any culturally stereotyped views held of Eskimos are reduced rather than reinforced. 93351
The inevitable change in the bad schools in northern Alberta in the 1980's / Urion, C.
(Indian ed, v. 7, no. 4, Summer 1980, p. 2-9)
ACU

This article is a reassertion that the quality of education which most Indian people receive is extremely poor. Racism is seen as a major problem that continues to play a role in deterring "good schools." Poor schooling necessitates "academic upgrading" as a major component in job training programmes. Furthermore training programmes for native people, as well as for other locals, are implemented when jobs have been already filled by outsiders. This procedure reduces the pressure of local demand for jobs. (LET)

Development and James Bay : socio-economic implications of the hydro-electric project / Salisbury, R.F. Filion, F.G. Rawji, F. Stewart, D. Societe de developpement de La Baie James (Quebec) [Sponsor].
Montreal : McGill University, 1972.
195 p. : tables ; 28 cm.
Appendices.
Cover title: Development and James Bay: social implications of the proposals for the hydroelectric scheme.
ACU

This report tries to bring together what is now known about the social life of Indians and white people in the James Bay region of Quebec and to look at it in the light of our knowledge of what development has involved in other places .... It analyses what would probably happen by 1980 if there is no big hydro-electric project .... It then takes the plans of the James Bay Development Corporation, as they have developed up to May 1972, and sees how they would alter life in the area. It considers hunting, wage work, education and the place of towns. The major finding of the study is that this is one of the last areas of North America where native people have been able to successfully continue a hunting way of life, without the young people migrating away to big cities for work. ... The large increase in the number of young adults in the next ten years means either that they will have to migrate out, or that many new jobs will have to be created in the North. Unless the native people of the North immediately plan how to meet this crisis the future will be black; the hydro-electric project could help to solve the crisis, but only if it is adapted to meet Indian needs, and only if Indians themselves participate in the planning. Even if the native people do decide to participate in the hydro-electric project, they should continue to plan for what life would be like after 1980, when construction would be almost over. ... Social and economic impact of proposed Arctic Gas Pipeline in northern Canada. Book 2 / Gemini North Ltd. Canadian Arctic Gas Pipeline Limited [Sponsor].
[Canada] : Canadian Arctic Gas Pipeline Limited, 1974.
1 v. (various pagings) : tables ; 28 cm.
ACU

[One of seven volumes: Social and Economic Impact of Proposed Arctic Gas Pipeline in Northern Canada]. The purpose of this volume is to evolve estimates of the employment impact of a natural gas pipeline in northern Canada. ... This volume is not so concerned with the total temporary and permanent increments to production and incomes generated by the project from within the region as with estimating that portion of income generated from gas developments which is a permanent feature of the regional economy. It is in this sense of residual regional income that employment effects provide a reasonably good proxy. In determining the most likely number of northern jobs, we have separated potential employment impact into the following three categories: a. Direct Employment: employment directly associated with construction and operation of a natural gas trunk pipeline. ... b. Indirect Employment: employment associated with gas exploration field development and production, gathering systems and gas plants, and related transportation services. ... c. Induced Employment: employment generated in other service and support activities. ... By comparing the proposed gas pipeline and related indirect and induced employment with the existing and expected regional employment base in the absence of the project and also with the

forecast labour supply, it is possible to obtain estimates of the employment impact of the project. ... (Au)

Thesis - McGill University, Montreal, Quebec, 1968.
ACU

It was hoped, through a study of Schefferville, Quebec, with additional information from Gagnon, Quebec, and Labrador City and Wabush in Newfoundland-Labrador, to learn if there has been any development of stability in the population and labour forces in these communities and to delimit any causal factors. ... the link between the nature of the resource base and the instability of the community is a complex one. It is assumed that the factors behind such stability may be divided into two groups. Firstly, those connected with the migrant ... Secondly, those factors connected with the northern community itself and the degree of satisfaction given to the migrant by its physical and social facilities. ... The companies need as stable a labour force as possible ... if the turnover is high, the mining efficiency suffers. ... It is suggested that this is a consequence of firstly, the characteristics of the workers, i. e., their age and mental status, as the older and married men stay longest. Secondly, the origin of the worker is important; the close geographical and social proximity of the major source areas is a contributory factor in permanence. The size of the formative community is also important in other workers perception and evaluation of the mining town, the workers from rural areas and small urban centres adapting best. Thirdly, the provision of amenities in the northern town, ranging from housing provision to recreation facilities is a contributory factor. The company financial benefits, training and promotion are also significant in lowering turnovers and increasing stability. The perception and evaluation of these factors will vary with the education and skill levels of the migrant. ... (Au)

The lower Mackenzie region : an area economic survey / Bissett, D.
Ottawa : DIAND, 1967.
xii, 520 p. : maps (some folded), tables ; 29 cm.
Appendix.
Bibliography : p. 505-520.
ACU

"The lower Mackenzie Region" Area Economic Survey is an attempt to examine the lower Mackenzie River area and its diversity of physical and human landscapes. ... the survey includes the settlements of Inuvik, Aklavik, Fort McPherson, Arctic Red River, Reindeer Station and Tuktoyaktuk and their general resource areas. ... The present status of the economy is unsatisfactory in terms of productivity, the input of monies for development and the outflow of products. Marketing systems are unsatisfactory or ill-defined. A program of integrated resource use and the establishment of marketing systems appear to be absolute requirements. Continuing advancements in education, and a replacement of non-residents with residents in positions of increasing responsibility will partly solve the problem of increasing population. For the interim period continuous efforts should be made to encourage out-migration of younger age groups. (Au)

Communities of the Mackenzie : effects of the hydrocarbon industry / Van Ginkel Associates Ltd. Canadian Arctic Gas Study Limited [Sponsor]. Gulf Oil Canada Limited [Sponsor]. Imperial Oil Limited [Sponsor]. Shell Canada Limited [Sponsor].
[S.l. : s.n.], 1975.
131 p. : folded maps, tables ; 28 cm.
ACU

The objective of this study is to measure and define the economic and social impact of the proposed Mackenzie Valley natural gas pipeline and the associated hydrocarbon exploration and development activities, on the people and the communities that will be directly affected. ... It was concluded that, in economic terms -- jobs and income -- the impact of a decision to build the pipeline should be more favourable to the people in the study region than the impact of the decision not to build a pipeline. In terms of the social impact of the decision to build the conclusions are, of necessity, subjective. ... it is argued with some apparent relevance that increasing income will increase social dislocation ... reduce anti-social behaviour and so improve the social circumstances in the study area. ... The creation of jobs and income ... will increase the revenues of the communities and will contribute to financing the improvement of the communities. The implication of the decision not to build the pipeline and so to deny the associated hydrocarbon activities, will be to forego these improvements or to effect them at the cost of the general Canadian taxpayer. It is concluded that, in terms of the improvement of the communities, the further development of the hydrocarbon industry through the decision to build the pipeline should be positive in its effect. The 'shift method' in the Arctic / Armstrong, T.
(Polar record, v. 18, no.114, Sept. 1976, p. 279-281)
References.
ACU

This paper examines an example of the functioning of ... the shift method ... of working mineral resources in remote northern locations. The essence of the method is that the workers have their homes and families at some established centre in the south, and are flown in to their place of work in the north for shifts of a few weeks, during which long hours are worked. Thus at the northern end living accommodation can be very simple, with no need for elaborate social facilities, and substantial economies should accrue. ... (Au)

... The predicament of the contemporary Canadian Eskimo is deeply troubling. It embodies ... the destructive processes and social deformations that colonialism everywhere entails. Despite this book's anthropological biases, it is not concerned with traditional Eskimo society as it may have been before its transformation by southerners. Nor does it dwell on the Eskimo people's initial responses to that intrusion. Rather, it is based on the conviction that it is the present situation of both Eskimos and Whites in the north that deserves attention. That conviction explains the structure of the book: it is a way of expressing my solidarity with the Eskimo people who have so tirelessly tried to help me understand what is happening to them now and what they fear may happen to them in the future. [Wage employment and labour are discussed]. (Au)

Changes in Ross River during the Anvil Mine development / Sharp, B.
(Yukon case studies : Alaska Highway and Ross River / by J. Cruikshank and B. Sharp.
Whitehorse : University of Canada North (Yukon), 1977, p. 45-89)
Bibliography: p. 89.
ACU

This case study examines the social, economic and political effects which a large scale development - the opening of the Anvil Mine - had upon the residents of Ross River. ... Ross River was an isolated settlement prior to development of the Anvil Mine. The major events which occurred with Anvil Mine were ... 1. a large, imported labour force. 2. ... A rush of mineral exploration accompanied development of the mine; 3. an expansion of the transportation and communications infrastructure to facilitate the initial development and future potential growth. ... and 4. a commitment that local residents would share in the benefits of the developments. Both the mining company and the Federal Government expressed concern that people of the region, particularly Native people, should benefit. ... [It was concluded] that, for the Indian people of Ross River, the development was too much, and too fast to allow the evolution of social and cultural mechanisms to cope with change and to allow them the opportunity to gain, economically from the development. To the white people, the boom was a period in which considerable economic opportunities could be realized. The development, occurring when and as it did, demonstrated the differences between the two segments of the community, rather than emphasing mutual interests and potentials for mutual community gain. ... (Report - Canada. Task Force on Northern Oil Development, no. 74- 21)
Appendices.
Bibliography: p. 208-211.
ACU

This study is to provide the basis for an assessment of the consequences of building and operating a trunk gas pipeline through the northern Yukon upon the social and economic life of the people of Old Crow, Y.T. ... The report in various places tells of the inrush of the outside world and the pressure upon the community and its leadership to agree, to decide, to make up its mind, to say what it wants. ... Over half the people get more than half their food from the land. ... At the same time there is a rise in the income from wages and some people are prepared to leave the village for work, training and school. ... The existence of wage opportunities and the prospect of them increasing, leads to economic independence of individuals. This, in turn, can break down the interdependence among people, affects the cohesiveness of the family, and may cause personal destruction through gambling and liquor. ... wages are not all bad. Cash is now a necessary item because people wish to travel more, purchase goods outside, have new skidoos or kickers, improve the house and be able to feed and clothe their families adequately. ... The pipeline project will offer plenty of chance to work, at least in the construction period. ... What is less predictable is the aftermath. ... The positive effects like training, increased wealth and experience could be dissipated or go unused after the project finishes. However, if there were one, two or three more jobs on a permanent basis for Old Crow men as a result of the pipeline, then a few more families would have economic security; the value of this prospect is recognized and desired. .. A socioeconomic evaluation of Inuit livelihood and natural resource utilization in the tundra of the Northwest Territories / De Pape, D. Phillips, W. Cooke, A. Inuit Tapirisat of Canada [Sponsor].
[Edmonton] : University of Alberta ; [Waterloo] : University of Waterloo, 1975.
114 p. : figures, tables ; 28 cm.
(Renewable resources project reports - Inuit Tapirisat of Canada, v. 4)
Appendix.
Bibliography: p. 85-95.
ACU

This report has provided an analytical and conceptual view of resource utilization in the tundra and associated implications regarding the long term welfare of its inhabitants, particularly the Inuit. Adoption of a safe minimum standard approach to conservation policy requires the avoidance of environmental damage from surface and subsurface resource uses as well as the need for Inuit to retain their land-based ties. Long term maximum renewable resource use subject to irreversibility avoidance should be sought to ensure long term viability of the tundra community. Lump sum monetary settlements arising from the forthcoming Inuit land claim negotiations should not be used to replace services provided by government but rather invested in local and outside projects from which long term income can be maintained. The Inuit in their negotiations with the federal government should press for rights to utilize resources for traditional pursuits and tourism, regardless of ownership. The land claims can facilitate the long term availability of resource use options conducive to long term Inuit welfare. However, such claims will in no way guarantee that a strategy of resource use employing a safe minimum standard coupled with maximum development of long term renewable resource use opportunities will be adopted. These claims are only a beginning. [The appendix discusses Inuit population and income]. (Au)

The changing Eskimo economy : wage employment and its consequences among the Eskimos of Frobisher Bay, Baffin Island / Yatsushiro, T.
[Canada : s.n.], 1960?
13 p. ; 30 cm.
Paper presented at the annual meeting of the American Anthropological Association in Minneapolis, Minnesota, November 17-20, 1960
ACU

This report suggests that attitudes towards wage employment are affected by: personal relationships with supervisors and other employees, individual perception and conception of whites and their culture, actions and policies of Government and private agencies, and the Eskimos conception of time. Wage employment and the cultural change involved are causing tension, some inevitable. The author suggests that one means of easing that tension is the establishment of a self-governing political body to represent the Eskimo population. (Au)

Bibliography: p. 236-421.
Thesis (Ph.D.) - University of Nebraska, Lincoln, Nebraska, 1961.
ACU

The objectives of this study are to describe and analyze the recent economic developments of the Canadian Northland and to make observations on the comparative developments in the Siberian Northland. ... Specifically, this dissertation begins with an introductory chapter, which deals with the objectives of the dissertations, the problem of delimiting the Northlands, and a simplified description of the evolution of the economies of the Northlands. The second

chapter, The Natural Environment of the Canadian and Siberian Northlands, presents the physical geographies of the two regions, with special emphasis on the opportunities and limitations of the resource bases of the two regions. With the details of the two natural environments well established, the reader can readily perceive that while the two areas are generally similar with respect to natural conditions there are important differences in the physical geographies of the two regions. Consequently, the two Northlands have slightly different resource bases. The next ten chapters deal with the development of the resource bases of the Canadian and Siberian Northlands, ... These chapters are: Mining Industry, Renewable Resources, Transportation, Population, [which includes a discussion on Labour and occupation] and Scientific Investigations and Military Activities. In the final chapter, my observations on the economic similarities and differences of the two Northlands are presented. ... (Au)

Report on the Northwest Territories manpower test survey / Canada. DIAND. Economic Staff Group.
[Ottawa] : DIAND, 1968.
116 p. : tables ; 35 cm.
Appendices.
ACU

The purpose of this report is two fold. ... to discuss some of the problems encountered and conclusions drawn. This is done in the main body of the report. Its second purpose is to serve as a storehouse of experience and knowledge gained during the course of the survey. This is fulfilled by a series of appendices which consist of the reports of the committees ... The ... Survey was to provide accurate and comprehensive data on the labour force of the Northwest Territories. Data on the supply side of the labour market can fill a variety of purposes ... For example, such data can be used to determine the level of technical sophistication at which industrial development is possible in a region, and the feasible rate of introduction of new techniques. Such data further permit planning programs to upgrade the level of skill and education of a population. ... They can [also] be used to place individuals with the appropriate educational and experiential background into existing job opportunities, and to make employers aware of individuals having suitable qualifications. As aggregate data, data on the supply side of labour might, along with other data, be used to support arguments that federal programs related to the problems of regional unemployment or underemployment should be made available to the Northwest Territories. ... ix, 85 p. : figure ; 28 cm.
References.
ACU

There is an unwillingness to admit that training programs for the disadvantaged generally and for northern isolated communities in particular are not economic and, therefore, require a public subsidy. This study's contention is that, taken together, both economic and social benefits from training justify public expenditures. An approach is outlined and applied to the Northern Manpower Corps Churchill Prefab Housing Project in Manitoba. The objectives of the plant including training, employment, housing for low income families, economic development of Churchill and social development of Northerners are reviewed. Study indicates positive social benefits in four categories and, overall, that the most important social benefits cannot be measured in dollars and cents. (NPB)

The human ecology and social and economic change in the community of Tuktoyaktuk, N.W.T. / Ferguson, J.D.
Ottawa : Dept. of Northern Affairs and National Resources, 1961.
[8], 80, ix p. : ill., figures, maps ; 28 cm.
(Report - Canada. Northern Coordination and Research Centre, 61- 2)
ACU, OORD

This study examines the social organization of the Tuktoyaktuk Eskimos in relation to the resources of the area, using data gathered in the field in 1957. Population characteristics and health conditions are described, and the history of culture contact and change outlined. The author predicts little increase in the number of permanent jobs available to Eskimos in the area, and a decrease in part-time summer employment as freight-handling becomes more mechanized. At the same time, the number of employable males would increase by about five per cent yearly. The fur market was unlikely to rise because many synthetic materials were replacing natural fur. Furthermore, Tuktoyaktuk was not a good trapping area. (NPB)

Native training and employment study / Policy Development Group Limited. Rudnicki, W. Polar Gas Limited [Sponsor].
[Toronto : Polar Gas], 1978.
1 v. (various pagings) : folded figure, tables ; 28 cm.
(Community program planning - Polar Gas Limited)
Appendices.
Bibliography : p. 1-7.

The purpose of this study is to explore the ramifications, feasibility and potential scale of native employment on the proposed Polar Gas pipeline. It also identifies and discusses the important factors which need to be taken into account in shaping programs and strategies to enhance native access to pipeline jobs. The study deals with the Manitoba and Ontario sectors of the project only. ... This study ... tends to emphasize ... a way of addressing the issue of native training and employment, more than it does the instrumental aspects of training content, scheduling and programming. A fundamental assumption throughout the study is that no matter how well-meaning or sophisticated programs are, native people are not likely to understand or accept them if they play no part in their formulation. ... A part of the larger context which this study addresses ... is the need for an approach by governments and industry which transcends the strict technical and manpower imperatives of pipeline construction and operation. ... Such apparently straightforward intentions, therefore, as the training and employment of native people on a major northern project tend to be tangled in a web of complex and imponderable issues. It seems clear that whatever the appropriate prescriptions for action may be, no one level of government nor any single industry holds the key. The study predicates its approach on a need for joint planning among all the parties concerned, including the communities which would be most affected by the construction of a pipeline. (Au)

Northerner training program, section 14.f : an exhibit in support of applications to the Department of Indian Affairs and Northern Development of the Government of Canada for authorization to use land and to the National Energy Board of Canada for a certificate of public convenience and necessity authorizing the construction of pipeline facilities / Canadian Arctic Gas Pipeline Limited.
[S.l. : s.n., 1974+].
1 v. (various pagings) : tables ; 28 cm.
Appendices.

... [This report addresses the need to create employment opportunities for native Northerners] the text which follows provides ... evidence of ... support of National objectives, outlined on page 10 of Canada's North 1970-80 (Department of Indian Affairs and Northern Development, Canada's North 1970-80, March 1973), and of compliance with the Expanded Guidelines for Northern Pipelines. The applicant plans to "undertake to provide specific programs leading to the employment of residents of the North, both during the construction phase and the operation of the pipeline." And as a beginning, and based on the premise that current performance is the best basis for predicting future performance, Applicant and its colleagues now have a training program for Northerners in operation. This is not to say that the training program currently administered by the Applicant, and those planned for the future, are the best possible programs; rather, it is Applicant's position that they are, and will be, planned and administered for the benefit of the trainees as the highest priority, and will compare favorably with most of the previous occupational preparation programs planned for native Northerners (Boreal Institute, vol. 1, 1972, pp. 93-103 submitted as a separate Volume appendix hereto). The participants in the training programs, of course, must be the final judges of this position, and it is the success thus far of present trainees in adapting to this form offered by the Applicant which encourages the Applicant to be confident about expected results. ... Canada's "unemployable" northerners : square pegs in round holes in the system to be created for the international transfer of energy by pipeline from northern Canada to the United States / Stucki, L.D.
[S.l. : s.n.], 1972.
vi, 187 leaves ; 30 cm.
Appendices.
References.
A paper to be presented at the 71st annual meeting of the American Anthropological Association, December 1, 1972.
ACU

This paper is concerned with how native northerners will fare if the Mackenzie Valley Gas Pipeline is built. It is recommended that rather than a pipeline, that "an integrated oil and liquified gas railway from Prudhoe Bay, Alaska to at least Trout River, N.W.T." be constructed. This is seen as a far "superior solution to the ecological, social, and chronic native unemployment problems that are so severe in Northern Canada". (LET)

Ottawa : Northern Co-ordination and Research Centre, 1961.
viii, 197 p. : ill., figures, tables ; 28 cm.
Appendices.
Bibliography: p. 192-197.
ACU

This report compares camp Eskimos with a traditional subsistence economy to settlement Eskimos with wage labour for white employers. After a general description of all aspects of the community the acculturation and assimilation aspects of both groups are analyzed. The author suggests that wage labour increases the acculturative trend among settlement Eskimos, but it has the latent hazard of fostering a caste system of Eskimo laborers and White supervisors. Further, he suggests that cooperatives and Eskimo run independent enterprizes might bring a sense of equality into Eskimo-White relations. (LET)

The socio-economic impact of the Pointed Mountain gas field / Scott, M.
[Ottawa] : DIAND, 1973.
72 p. : figures, tables ; 28 cm.
Appendices.
References.
ACU

The results of the study of the socio-economic impact of production and transportation of gas from Pointed Mountain indicates that: 1) Local native men have worked on different construction phases. 2) Native workers adjusted rapidly to camp life and their work performance was satisfactory. 3) Most natives held labourer's jobs, and exposure to acquire experience for other positions was minimal. 4) "The right-of-first-refusal for short-term jobs is probably a better method to promote native employment than a quota system". 5) Short-term employment, for a few natives, has continued after the gas was on stream. 6) The men, employed in the twelve permanent jobs, are rotated to jobs in southern Canada on a weekly basis. Methods to encourage the participation of native people of northern Canada in health care delivery / Martin, J.D.
(Circumpolar health 81 : proceedings of 5th International Symposium on Circumpolar Health, Copenhagen, 9-13 August, 1981 / Edited by B. Harvald and J.P.H. Hansen. Report - Nordic Council for Arctic Medical Research, 33, p. 96-100)
References.
ACU

Considerable concern has been voiced about the minimal involvement of northern natives in health services, both as health workers and as consumers interested in taking responsibility for personal health. Government and private agencies have found considerable difficulty in integrating native workers into the labour force. This article attempts to find solutions for this serious problem. Suggested solutions are: education, attitudinal change on the part of non-natives, training programs in the North, training of native people for supervisory positions. Projects which are presently underway to help alleviate this problem are also discussed. (ASTIS)

References.
ACU

... In the mid-1960's, the McGill-Cree Project initiated a prospective study of the impact of culture change on the 2,000 Mistassini and Waswanipi Cree, anticipating their transition from a hunting way of life to that of quasi-permanent settlement and wage labour in the rapidly developing mining, forestry and petrochemical industries of the region. ... The principal area of theoretical interest to us in our earlier work was the effect of rapid culture change and acculturative stress on the personality organization of Cree youth, those who had experienced a number of years of Eurocanadian culture contact as a consequence of being sent to Indian residential schools in towns far to the south of James Bay, where Cree cultural identifications were discouraged or devalued and identification with Eurocanadian cultural norms was encouraged .... Our principal hypothesis was that the enculturative discontinuity inherent in this process would generate more intense identity conflict in Cree youth the longer they continued their educational careers and the more they experienced parental disapproval for prolonging their education. We also hypothesized that identity confusion would be characteristic of those who had the greatest discrepancies between educational, occupational and residential aspirations on the one hand and expectations of achieving their aspirations on the other. In this report, data are presented on the educational, occupational and residential aspirations and expectations of 77 Mistassini students interviewed in 1967-1968 and a comparable group of 26 Mistassini youth who attended school in 1979-1980. ... Environmental social program, Mackenzie Valley, northern Yukon pipelines June 1974 / Canada. DIAND.
[Ottawa : DIAND], 1974.
197 p.
Document not seen by ASTIS. Citation from NPB-V1.

This report is concerned with the people, the natural environment and resource use in the Mackenzie Valley and the Northern Yukon, and how these aspects might be affected if pipelines were built to move natural gas or oil to Southern markets. It includes a description of the present demographic aspects of the population: statistics on birth rate, death rate, rate of natural increase, sex distribution and trends in school enrolment, vocational training and labour force. The estimated labour supply and demand related to pipeline construction and operation is also examined. (NPB)

105597
Assessment of northern native male labour force potential in the rest of the Mackenzie / Canada. DIAND. Data Management Section.
[Ottawa] : DIAND, 1974.
12 p.
Document not seen by ASTIS. Citation from NPB-V1.

This paper contains an assessment of the northern native male labour potential in 1981 in that area of the Mackenzie District outside the Mackenzie Valley Pipeline Corridor. Designated as the Rest of the Mackenzie, the study area excludes all those communities contained within the Pipeline Corridor and the Arctic Coast communities of Holman Island, Coppermine, Cambridge Bay, Gjoa Haven, Spence Bay and Pelly Bay. (NPB)

Assessment of northern native male labour force potential in the Mackenzie Valley pipeline corridor / Canada. DIAND. Data Management Section.
[Ottawa] : DIAND, 1974.
11 p.
Document not seen by ASTIS. Citation from NPB-V1.

This paper contains an assessment of the Northern native labour force potential in the Mackenzie Valley pipeline corridor in 1981. The assessment is based on a review of existing data sources, most of which are contained within studies on the probable impact of the construction of a large diameter gas pipeline down the Mackenzie Valley. (NPB)

105619
Regional impact of a northern gas pipeline, volume 7, appendix 1 : pipeline impact on labour force utilization in the Northwest Territories / Canada. Environmental-Social Program, Northern Pipelines.
[Ottawa] : DIAND, 1973.
Document not seen by ASTIS. Citation from NPB-V1.

This Appendix is composed of the statistical analysis of population, labour force, and pipeline occupational demand and supply. It includes an analysis of the source data and basic relevant demographic estimates for 1970, projections of population and male labour force to 1985 as well as estimates of potential pipeline job demand on the Northwest Territories. (NPB)

105627
Settlement council labour pools : a feasibility study for the government of the Northwest Territories and the Department of Indian Affairs and Northern Development, volumes 2 & 3, appendix 1 & 2 / Gemini North Ltd. Canada. DIAND [Sponsor]. N.W.T. Government [Sponsor].

Document not seen by ASTIS. Citation from NPB-V1.

Work Arctic is a non-profit unincorporated organization established in 1972 to train and employ the local labour force, particularly natives, in useful and productive work. The aim of the program is to organize and train a section of the work force that is not filling the jobs now available in Hay River primarily because they lack certain skills or work habits. The obstacles to employment may be language barriers, different concepts of responsibilities, lack of understanding, lack of training and or lack of opportunities. In a way Work Arctic is a stage where people who are not normally part of the labour force can be systematically trained and where employers can see the result. The results of the program are impressive. Between eighty five and one hundred pay cheques are processed weekly. About 75 per cent of the work force is native. The men working in crews have accomplished a phenomenal amount of work, mainly clearing fire breaks and future sub-divisions and other slash programs. A list of projects is attached. The record of absenteeism has been good, social welfare in Hay River is down, grocery sales are reportedly up, and there is a notable lack of excessive drinking which often accompanies increases in northern payrolls. Statistics provided on labour force, participation rates and population for settlements in Mackenzie River Valley and Delta. (NPB)

105635
Yukon Territory manpower survey : statistical tabulations / Canada. DIAND
Ottawa : DIAND, 1972
1 v. : tables.
Document not seen by ASTIS. Citation from NPB-V1.

Results of a 3 month manpower survey of the Territory's Indian and Metis population. Basic demographic data and information on education, work history and income were obtained. The reference year was Oct 1, 1970 to Sept 30, 1971. Data compiled in a computer printout format. (NPB)

105643
Training for employment the native people and the federal public service / Bowles, K.
[Ottawa] : DIAND, 1974
38 p.
Document not seen by ASTIS. Citation from NPB-V1.

This paper considers the northern native people and their characteristics as they apply to the development of training programs designed to meet occupational skills. Since the primary purpose of training is to achieve satisfactory occupational performance, work characteristics are examined as well as learning characteristics. (NPB)

105651
Characteristics of Mackenzie Delta natives and their relationship to employment policies / Canada. Northern Development Program. Bowles, K.
[Ottawa] : DIAND, 1974
38 p.
Document not seen by ASTIS. Citation from NPB-V1.
QMMNS

This paper attempts to relate background, lifestyle and interests of the native people of the Delta to the guidelines on employment, education and training of the Northern Development Policy 1971-81. The material is

drawn from a research study by Dr. D.G. Smith, carried out in the Mackenzie Delta during the period 1965 to 1970. Since that period, economic activity has increased considerably but the changes in the situation portrayed are in degree only. (NPB)

105660
On the economic development of Canada's Northwest Territories / Anders, G.
[S.l.] : Graduate College of Texas A. & M. University, 1972.
Appendix
Document not seen by ASTIS. Citation from NPB-V1.

The Canadian government has in recent years spent up to $80 million annually to develop the Northwest Territories, an area of about one and a quarter million square miles. Firstly, the problem of widespread native unemployment is considered. The study traces the way in which the high level of attenuation of private property rights prevailing in traditional native society affects the slope of indifference curves between income and leisure. It is shown to result in a negatively sloped labour supply curve. The effect of selected welfare measures among groups characterized by differently sloped indifference curves is shown to explain the behaviour of natives in the labour market. Secondly, the influence of different basic world views - immanentism and transcendentalism - upon the way in which development models are constructed and in which policy constraints are determined is discussed. A table is set forth which provides an overview of the way in which the two basic world views are related to questions of the methodology used in development economics, the justification of development policy and the determination of policy constraints. Some of the major development theories are then discussed in the light of these considerations. Thirdly, an appendix provides, basic geographic, geological, meteorological, demographic, and economic data bearing upon problems of northern development as far as such data are presently available. This is supplemented by three original maps. (NPB)

105902
The economy and population shifts of the Eskimos of Southampton Island / Van Stone, J.W.
[S.l. : s.n.], 1959.
9 p.
Document not seen by ASTIS. Citation from NPB-V1.
DORD

Based on research in 1959, this report briefly sketches the history of European contact with Southampton Island, and describes the geographical distribution of the Eskimo inhabitants, many of whom came from adjacent areas earlier in this century. The Hudson's Bay Company established its post at Coral Harbour in 1924. An airfield was constructed a few miles from the settlement during the Second World War, and continued to operate. Later, the Department of Northern Affairs and National Resources established a school and other facilities at Coral Harbour. The Eskimos had tended increasingly to group themselves in the vicinity of the settlement and airfield, in order to be close to sources of possible wage employment, most of it temporary and seasonal. This concentration of the population apparently had resulted in the incomplete exploitation of the comparatively rich game resources of the island, which could support a much larger number of people. The shift to a partial wage economy was resulting in a gradual disintegration of the aboriginal economy, but the new wage base did not appear sufficiently stable to meet the needs of the people. (NPB)

105929
Occupational preferences of northern students / Smith, D.G.
[Ottawa] : DIAND, 1972.
23 p.
(Social science notes, 5)
Document not seen by ASTIS. Citation from NPB-V1.
ACU

This is a report on the initial findings of a questionnaire study conducted among over one thousand high school students of all ethnic groups in the Mackenzie River delta, Yellowknife, Churchill and Frobisher Bay. The questionnaires explored the occupational prestige values and occupational aspirations of the students, and found a strong correlation between all ethnic groups. It was further apparent that the school students attended, rather than their ethnic affiliation, was a principal factor in this similarity. (NPB)

105937
A catalogue of data in the Statistical Information Centre / Canada. Indian and Eskimo Affairs Program.
[Ottawa] : DIAND, 1977.
24 p.
Document not seen by ASTIS. Citation from NPB-V1.

This catalogue provides a listing of the data available in the Statistical Information Centre. This material is updated on a continuing basis and covers aspects of the Indian and Eskimo Affairs Program. These data deal primarily with Indian and Eskimo statistics for Canada as a whole. However, many tables are broken down to provide data by province, region or administrative districts. In these cases, data specific to the Yukon and Northwest Territories are provided. (NPB)

Native employment : Alaska Highway Pipeline Project / Canada. Northern Economic Planning Branch. Data Management Division.
[Ottawa] : DIAND, 1977.
1 v.
Appendices.
Draft for discussion purposes.
Document not seen by ASTIS. Citation from NPB-V1.

This report prepared in draft form only, but available for general distribution, is a quantitative analysis of the available native labour in the Yukon Territory, using data from the 1971 Census, Registry of Indians covered by the Indian Act, and the Yukon Manpower Survey carried out by the Department of Indian Affairs and Northern Development in 1970-71. The report is in three parts as follows: 1. Population profile of the Yukon Territory, 2. The supply of labour, 3. The demand for labour. A number of preliminary conclusions and hypotheses are set out as a result of the quantitative analysis. The report includes three appendices dealing with the following topics: A. The size of the Yukon Native population, B. Disposition of available labour time, C. An approach to the evaluation of self-subsistence activities. (NPB)

ACU

Distinguishes three types of natives in this region: people on the land, settlement dwellers not in continuous employment, and settlement dwellers in continuous employment. Using a means-ends theoretic approach, the goals of each group, the means used to attain these, the degree of attainment and frustration-response behavior are analyzed. Gambling, immoderate drinking, and other such responses are shown to affect chiefly, but not only the second group. Prestige is a major value-orientation and value confusion is considered important in the case of those who desire a "white" job, but idealize the independent fur-trapping existence of the past. A trend toward emergence of a service group (cleaners, brush-cutters, laborers, etc.) is apparent. Many have rejected life on the land without having means to hold steady jobs. Training is viewed as a specific means to obtain prestige goals and may not be generalized, so that if after training a specific job is not available resentment results. More generalized adaptive education rather than intensive specialized training is recommended. Persons entering training should share values and expectations consistent with the program goals. The author sees accelerated movement from the land and from camp life, and development of a class system as future trends among the native peoples of this area. (AB)

105961
Work-Arctic proves men prefer jobs to welfare / Sigvaldason, J.
[S.l. : s.n.], 1972.
Document not seen by ASTIS. Citation from NPB-V1.

Article describes the Work-Arctic pilot project set up by Hay River businessmen. It is a somewhat culturally adapted labour pool aimed at providing employment opportunities for the native population. The project is considered successful, and subsequent social impacts are seen as favourable. (NPB)

Comments on labour force origin and turnover in northern Manitoba / Rogge, J.R.
(Developing the subarctic / Edited by J.R. Rogge. Winnipeg : Dept of Geography, University of Manitoba, 1973, p. 127-145)
Document not seen by ASTIS. Citation from NPB-V1.

Examines the origin of the labour forces in Northern Manitoba towns with special emphasis on mining towns and tries to measure the degree of turnover (real migration) in terms of selected demographic and personal characteristics of the individual migrants. Factors considered include ethnicity, place of origin, age, and marital status. Since a high turnover rate seems to be a phenomena associated with many mining communities, the author suggests the need for a re-evaluation of planning and administrative approach to include this transient component. (NPB)

105988
The political economy of the Canadian north / Rea, K.J.
Toronto : University of Toronto Press, 1968.
453 p. : map, tables

ACU

Describes the Yukon and Northwest Territories, their population, administration and industries. Three stages are distinguished in their economic development: a rigorously applied laissez-faire (mainly fur trade) until the end of World War II; a large public investment in education, social welfare, housing and minor industrial development in the mid-1950's and the beginning of a hypothetical stage in the early 1960's with government deciding to abandon commercial feasibility as a guide to public investment in resource development. How decision-making might be improved by cost-benefit analysis for appraisal of provincial projects is discussed in conclusion. Tabulated data are given on metallic minerals and other production, wage rates, labor costs, air transport, roads, schools and other social services, population, income and prices; and a useful index is appended. Statistics on the participation of the native population in industrial activities in the Northwest Territories / Mauzeroll, G.
[Ottawa] : DIAND, 1973.
36 p.
Document not seen by ASTIS. Citation from NPB-V1.

The purpose of this study is to measure the participation of the native population of the Northwest Territories in the industrial activity of the region. Statistics on total employment of the native labour force of the Northwest Territories, by employer and industry group have been compared with the total employment statistics presented in "Total Employment Estimates for the Yukon and N.W.T. for 1967, 1968 and 1970." Native employment statistics have been derived from the Northwest Territories Manpower Survey; natives being defined as Metis, Indians and Eskimos. (NPB)

106038
Northwest Territories Indian and Eskimo population, specific age groups, projected to 1983, under varying assumptions of migration / Mathurin, D.C.E.
[S.l. : s.n.], 1969.
20 p.
Document not seen by ASTIS. Citation from NPB-V1.

The population statistics that are tabulated in this paper were extracted from output obtained from a computer projection of the indigenous labour force of the Northwest Territories. Two distinct sets of results are presented. One is based on a "natural increase" method whereby migration is ignored by either of two assumptions concerning in-migration and out-migration: (a) that neither takes place or (b) that one balances the other. The second set of results was obtained from an extension of the first method, wherein the influence of in-migration and out-migration was incorporated in the analysis. (NPB)

Eskimo administration 2, Canada / Jenness, D.
Montreal : [s.n.], 1964.
186 p. : maps, tables.
(Technical paper - Arctic Institute of North America, no. 14)
Document not seen by ASTIS. Citation from AB ACU

Examines government programs and policies since 1903, and assesses the present condition and future needs of the Eskimos. Royal Canadian Mountain Police posts had been set up in the Arctic for purposes of sovereignty and law enforcement; economic needs were left to the Hudson's Bay Co. posts and traders, and education and health services to the Anglican and Roman Catholic missions. By the late 1940's, the federal government began to assume greater responsibility for the Eskimos and established economic, education, and health programs which are described in turn. With changing conditions in the North, the Eskimos had changed from self-sufficient hunters to fur trappers, temporary wage laborers, and/or recipients of government relief. As their traditional economy and culture collapsed under the impact of white civilization, they became demoralized and apathetic. They urgently need employment, which might be provided by northern mineral developments but the prospect is uncertain. As their numbers increase, living standards and morale remain low. Special vocational training programs for young Eskimos, also establishment of Eskimo colonies in southern Canada, are suggested. (AB)

106127
Work adjustment of Inuit workers to oil exploration employment / Hobart, C.W. Kupfer, G.
(Western Canadian journal of anthropology, v. 4, no. 3, Jan. 1975, p. 73-88)
Document not seen by ASTIS. Citation from NPB-V1

Between November 1972 and May 1973, fifty-five Inuit men from Coppermine, N.W.T., were employed by Gulf Oil Canada in connection with oil exploration in the Mackenzie Delta, six hundred miles to the west of Coppermine. These men, who worked for varying durations at various jobs, comprised about one-half of the male work force of that small community. During the summer of 1973, the authors were approached by Gulf Oil Canada to do a study of the adjustment of the men to work and to camp life. They were also interested in the effects of the employment program on the men, their families and the community. (NPB)

106135
Population and labour force in Schefferville / Hilton, K.D.
(Research paper - McGill University. Sub-Arctic Research Laboratory, no. 24, p. 130-146, figures, tables)
References
Document not seen by ASTIS. Citation from AB ACU

Discusses the sex, age, origins and permanence of the Iron Ore Co. of Canada labor force, subsequent to the construction period. Factors affecting the force are need for skilled workers, small number of jobs suitable for females, fluctuations in past production and policy in recruitment. Hourly-paid workers are 61% native to Quebec Province, the South Shore-Gaspe area leading with 26%. This movement is related to the spatial and historic pattern of migration in that area. The population growth in Schefferville is analyzed for 1953-67. In comparison with northern mining communities elsewhere in Canada and in the USSR, the labor force is relatively stable in Schefferville despite its isolation, the adverse climate and seasonal nature of operations. The community has housing, recreation and economic benefits not often available in other towns of similar size. (AB)

106143
Alaska native participation in the Trans-Alaska Pipeline Project : a survey of manpower delivery systems / Gemini North Ltd. Canada. DIAND [Sponsor].

[S.l. : s.n.], 1971.
41 p.
Document not seen by ASTIS. Citation from NPB-V1.

The first part of this study presents the projection of the supply of labour in the Yukon and Northwest Territories to 1986; the second part presents estimates of the demand for labour in the Yukon and Northwest Territories to 1986, for the basic and non-basic industries. The labour supply and demand projections in this study were designed to provide a starting point for various quantitative estimates of future economic growth in the Yukon and Northwest Territories; they were not intended to be forecasts or predictions. (NPB)

106232
Migration to northern mining communities : structural and social psychological dimensions / Jackson, J.E.W. Poushinsky, N.W.
Winnipeg : Center for Settlement Studies, University of Manitoba, 1971.
1 v.
Document not seen by ASTIS. Citation from NPB-V1.

What is attempted in this report is to take into account the role of differing values people place on aspects of their social and physical environment. In attempting to account for variations in such variables as community satisfaction, it became necessary to examine the role of expectations, the extent to which ideals are met, and the extent to which a migrant's present community compares to his previous one. Our multidimensional analysis endeavors to include these factors as well as more traditional ones such as salary, participation in voluntary associations and the whole range of background characteristics. Along with comparing northern migrants to a southern population, the study examines four migration related dependent variables: past migration (number of moves per year since age eighteen), alienation, community satisfaction, and prospective migration (chance the respondent thinks there is that he will be in the community in five years). ... 106240
Initial environmental evaluation of the proposed Alaska Highway Gas Pipeline, Yukon Territory / Interdisciplinary Systems Ltd. Alaska Highway Pipeline Panel [Sponsor].
Winnipeg : Alaska Highway Pipeline Panel, 1977.
1 v.
Document not seen by ASTIS. Citation from NPB-V1.
ACU, OORD

The Alaska Highway Pipeline Panel was established in August 1976 to study and report on the physical, biological and human environmental implications of construction and operation of the proposed Alaska Highway gas pipeline in the Yukon Territory. There is growing concern about the impact of large-scale northern projects on native cultures and the social fabric of native communities. The native population residing within or in close proximity to the proposed pipeline corridor is grouped in five communities including Whitehorse where about one-half of the corridor native population resides. In the other four communities, Haines Junction, Teslin, Burwash Landing and Upper Liard, the native population is comparable or greater than the non-native population. Estimates of native population vary considerably. It would appear that native peoples comprise 9-17 per cent of the total corridor population. Data on language indicate that native cultures have already been heavily impacted in Yukon Territory. Only 425 persons in the whole of Yukon Territory are reported as using a native language as the primary language of the home. Information is presented on population of communities in proposed pipeline corridor, including detailed estimates of Indian population. Projected impacts on public health, and employment, are also included. (NPB)

Potential of northern labour force / Witty, J.R.
(Northern mining in the 80s : proceedings of the Northwest Territories Chamber of Mines 'Mining Days 1980', Yellowknife, May 7-8, 1980 / Edited by M.J. Wojciechowski. Kingston, Ont. : Queen's University, 1980. p. 47-50)
ACU

Growth in the potential labour force ... will be substantial in the north over the next ten years. ... Given zero net migration, the NWT potential labour force will increase by 658 persons annually for 1978-88, and by 574 persons thereafter. ... Growth in the NWT labour force due to migration is governed largely by market forces, whereas growth in the potential labour force due to natural increase and aging of the 'permanent' population is not. This growth requires the creation of employment opportunities so that persons entering the labour force become productive components of the northern economy. Growth in the labour force due to migration results from, rather than requires, economic development, and becomes a major concern primarily where this growth limits opportunities for the permanent population. (Au)

Manpower issues in Canadian mining / Bennett, W.J.
(Employee relations initiatives in Canadian mining : proceedings of the Fourth CRS Policy Discussion Seminar, November 22-24, 1978 / Edited by M.J. Wojciechowski. Kingston, Ont. : Queen's University, 1979, p. 3-13)
ACU

... the manpower issue revolves about the question as to how the mining industry is to recruit and retain, both in the present and in the future, the kind of personnel it needs for its successful operation. The authors of the study have noted that it is difficult to establish a single recruitment and retention program which will have relevance for the whole industry because of the wide differences in mining operations. Such differences as ore reserves, products and markets, location, the jurisdiction in which the mine operates, and the nature of the mining method and milling process all affect recruiting and retention policy. ... Dome Petroleum Ltd. 1981 Beaufort Sea operations evaluation / Dome Petroleum Limited. Hammer, L.
[Calgary, Alta.] : Dome Petroleum Ltd., 1981.
3 microfiches : figures, tables ; 11 X 15 cm.
(Beaufort E.I.S. reference work, no. RWZ02)
ACU

The Beaufort Sea operations evaluation is presented in four sections: 1. Drilling performance, 2. Offshore construction, 3. Environmental Affairs, research and development, and 4. Socio-economic considerations. 1981 investigations indicate that the discoveries at Kopanoar and Koakoak have the potential to be hydrocarbon accumulations with oil in place between 1.8 to 4.5 billion barrels in the Kopanoar structure and 2 to 5 billion barrels in the Koakoak structure. As a result Dome intends to conduct further appraisal drilling at both sites to further evaluate the potential of these discoveries. 1981 also saw construction of the world's first caisson retained island in arctic waters. The design and construction of the caisson retained island is described. During the past year Dome and Canmar's Environmental Group have conducted work in the areas of oil spill countermeasures, oil spill research and development, environmental monitoring and prediction, and biological - chemical research. The major accomplishments in these various areas are outlined. "Based on several years of accumulated northern experience, Dome Petroleum has been able to develop principles and implement strategies for local participation and benefits to provide visible advantages to local residents without adversely effecting social and environmental conditions. These policies and programs are described in an Action Plan entitled '1981 Social Economic, Cultural Agreement, Beaufort Sea Project'." Within the text is a summary of these programs in the areas of: northern employment and training, economic development, social and cultural programs, information and communications, and future development in the Beaufort Sea. Patterns of native employment in the Winnipeg labour market / Clatworthy, S.J. Canada. Task Force on Labour Market Development [Sponsor].
Ottawa : Supply and Services, 1981.
vi, 37 p. : ill., figures, maps, tables ; 28 cm.
Appendices.
Bibliography: p. 67-69.
OORD

The past two decades have witnessed the movement of increasing numbers of native persons from rural areas and reservations to urban centres. A small, but rapidly growing, body of research has attempted to document various aspects of the native migration process. Major gaps in our understanding however, remain; especially with regard to the characteristics of and circumstances experienced by the native populations which now reside in urban centres. This report highlights some of the principal findings of an on-going research program investigating the demographic composition and economic circumstances of Winnipeg's native population. Of particular concern in this study are issues related to patterns of employment and labour force activity among the city's native population. (Au)

Native women - Labour force development / Canada. Dept. of Employment and Immigration.
Ottawa : Employment and Immigration, 1981.
1 v. (various pagings) : ill. ; 28 cm.
Appendices.
OORD

In January 1981, the Native Women's Association of Canada invited the Minister of Employment and Immigration to meet with their Board of Directors to discuss Native women's employment needs and concerns about the Canada Employment and Immigration Commission's delivery of programs and services. As a result of that meeting, the Minister proposed, and NWAC agreed to, the striking of a joint NWAC/CEIC Working Group to further investigate the specific employment issues affecting Native women and to propose possible solutions to be pursued by both the Commission and the Association. The Working Group remained aware that the employment circumstances of Native women will require not only immediate remedial efforts but also a longer term investment of support services and intensified programming if significant progress is to be made in reducing the social and economic inequalities which exist for this group. This first report, therefore, sets out only an initial slate of short and longer term recommendations which can assist in the achievement of this objective. (Au)

Assessment of the socio-economic impacts of the Arctic Pilot Project on selected High Arctic communities / Interdisciplinary Systems Ltd. Arctic Pilot Project (Canada) [Sponsor].
Winnipeg, Man. : Interdisciplinary Systems Ltd., 1980.
xvi, 174 p. : ill., figures, map, tables ; 28 cm.
Appendices.
References.
Updated from 1978 version.
DONE

One of the most significant beneficial impacts of the Arctic Pilot Project on the local communities will be the provision of employment and business opportunities in both the project construction and operation phases. These will be most numerous between 1982 and 1985, when construction of the pipeline and the liquefaction plant and support facilities at Bridport Inlet takes place. Construction jobs will vary in number according to season, and, at times, there will be more job opportunities than local labour available. This conclusion is the result of consideration of such factors as the number and nature of project jobs that will be available, the size of the resident labour force, the work experience of local residents, and the employment rates prevailing at the time of the assessment. The availability of longer term operation jobs is [also] seen as an attractive feature of the project. ... (Au)

Summary report of the Task Force on the Educational Needs of Native Peoples of Ontario / Canada. Task Force on the Educational Needs of Native Peoples.
Toronto : Task Force on the Educational Needs of Native Peoples, 1976.
viii, 44 p. ; 30 cm.
OORD

... The Task Force concluded that: 1) There are three basic objectives: a) The education of Native peoples should reinforce their culture and their identity (as they define them) rather than destroying them. b) The education system should give Native people the option of living a native life-style, or of competing on equal terms in the general job market, or both. c) The education system should be of use to native society in general, not just to formally enrolled students; this by means of adult education programs and so forth. 2) Certain concerns are common to all Native peoples of Ontario, regardless of their status as Treaty, Metis, or Non-Status Indians, or their location: a) Native teachers and counsellors be trained and employed in all elementary, secondary, and post-secondary educational institutions serving Native peoples. b) Native peoples have the right to participate fully in making and implementing decisions which affect the education of their children. c) The curriculum must be adapted to meet the needs of all Native students, so that the education they receive reflects their cultural heritage. d) All Native students must receive adequate financial assistance to enable them to continue their education free from economic worries. e) The governments of Ontario and Canada must not only actively encourage the retention of native cultural identity in Ontario, but also ensure that the non-Native population develops a heightened awareness of and respect for the native cultural heritage. 3) There is need for an ongoing mechanism, representative of the Native people that would a) oversee the implementation of the findings of the Task Force b) monitor the Native education system c) periodically evaluate the system and report on it to the Native people and to the Government. To that end the Task Force recommended to the Ontario Cabinet the creation of a Council on Native Education. ... (Au)

Report to the Canadian Employment and Immigration Commission re: native employment programs of Amok Ltd., Syncrude Canada Ltd., Eldorado Nuclear Ltd. / Slavik (J.) and Associates.
Edmonton, Alta. : J. Slavik and Associates, 1979.
1 v. (various pagings) : 28 cm.
Appendices.
OORD

The purpose of this research project ... was to review the activities of three major resource

development companies AMOK, Syncrude Canada Ltd., and Eldorado Nuclear Ltd., who have undertaken special measures for the recruitment, employment and training of Native people. The three companies in the study vary considerably in size and financial resources, in the nature of their operation, stage of development and manpower requirements. Nonetheless, there was considerable similarity in their intentions, initiatives and operation of programs to employ Native people. All programs, according to company officials, were voluntarily undertaken. Syncrude Canada has one of the largest and experienced Native Employment Programs in Canada. Consequently their program represents the most extensive and systematic approach to Native Employment. The goals, timetable and other requirements for the AMOK program for Northern residents are specified in considerable detail in their surface lease agreement with the Government of Saskatchewan. Eldorado found it "in their best interest to formalize their native Employment Program" in response to "pressure" from Saskatchewan Native organizations and Government agencies. (Au)

Impacts of industrial employment on hunting and trapping among Canadian Inuit / Hobart, C.W.
[S.l. : s.n., 1981?]
28 p. : tables ; 28 cm.
References.
Paper presented at the International Symposium on Renewable Resources and the Economy of the North, Banff, Alberta, May 1981.
OONE

. . . Perhaps the most valid concern about . . . impacts of resource development and other industrial employment on native people relates to effects on their continued harvesting of renewable resources . . . The seriousness of this possibility is seen in the fact that these activities are central to the ethos, the dominant themes of the existing native cultures. These themes focus on love and knowledge of the land, being able to live on the land, depending on and harvesting its resources, and sharing the harvest of game and fish among kinsmen and friends. We see here the convergence and the mutual strengthening of four of the most important emphases in the contemporary native cultures: love of the land, veneration of the elderly who are the repositories of the traditional lore relating to comfortable survival on the land, dependence on the renewable resources which may be harvested given mastery of this lore, and sharing the yield of hunting and fishing expeditions with traditionally defined others, who will share the yield from their own efforts in return. The critical question . . . is: Does not increased industrial or wage employment jeopardize this surviving core of the traditional cultures? [The effects of increased resource development on Inuit culture are addressed in this paper] (Au)

162 p. : ill., map ; 28 cm.
This is volume 1 of a 3 volume set of reference books prepared for the Department of Regional Economic Expansion.
This handbook was written for use at the Native Awareness Workshop, 1981.
Revised edition March 1981 handbook. Includes section on historical development of Native Policy.
OONE

. . . [The workshop report] . . . will help support the effective utilization of staff dealing directly with Indian, Metis, Non-status Indian and Inuit employees and client groups . . . and provide management and staff with useful information, based on a sound framework, focused on DREE's role and responsibility with regard to the Native Peoples of Canada. . . . One of . . . [the] most pressing problems is the increasing number of Native youth reaching labour-force age (15-64). . . . We can expect great pressure on social, employment and economic programs and supports as over the next ten to fifteen years an average of 8,000 to 10,000 Natives each year will reach working age. Government's past performance in employment and economic development is cause for concern when thinking about the future. According to the Department of Indian Affairs and Northern Development, the number of jobs created annually on reserves is approximately 1,000. Obviously the number of jobs created annually on reserves in relation to the number of Indian youths looking for work falls far below their needs . . . (Au)

ACU

... Many departments of the federal government now offer specific programs to native peoples. ... We recommend that procedures be put in place for rationalising and standardising the information which is collected and made available on these programs as to best meet the combined needs of all involved departments and central agencies of the federal government. ... The purpose of the present study, called the National Data Base Study, is to update and expand upon this initial work and to broaden the study to include all native peoples ... The outcome of this study is a national data base providing both descriptive and financial information on programs and services offered to native peoples. ... (Au)

Issues concerning the role of native women in the Winnipeg labour market / Clatworthy, S.J.
Canada. Task Force on Labour Market Development [Sponsor].
Ottawa : Supply and Services, 1981
1 v. (various pagings) : figures, tables ; 28 cm.
Appendix.
References.
OORD

In ... earlier reports, the author investigated several dimensions of the demographic structure, employment patterns and labour force activity of Winnipeg's native population ... Among other things, this prior research found employment problems to be most acute among native women suggesting that this sub-group in particular, be singled out as a priority special need group for the purpose of employment programming development. The present study seeks to provide some additional information related to the development of employment strategies for native women by: i) reviewing and synthesizing the results of ... earlier research as they relate to the present and potential role of native women in the labour market; and ii) outlining briefly some of the major constraints or barriers which presently retard the participation and performance of native women in the labour market ... A brief summary and implications of the study's findings for policy and program development conclude the report ... (Au)

The effects of education on native behavior in the urban labour market / Clatworthy, S.J.
Canada. Task Force on Labour Market Development [Sponsor].
Ottawa : Supply and Services, 1981.
iii, 27 p. : figures, tables ; 28 cm.
References.
OORD

... Much controversy exists with respect to how the objective of improving the employment situations of urban native people might be accomplished. Programming efforts to date have generally been founded on the rationale that education or skill training will translate into greater labour market success. Although education or skill development has been shown to positively effect labour market performance for the general population, there has been little systematic analysis of the issue among urban natives. ... This study's scope is constrained to three dimensions of labour market behaviour including: a) rates of labour force participation, b) rates of unemployment, and c) the nature of native occupations. A brief review of the study's results and discussion of the study's implications for labour market policy ... [is included] (Au)

Integration des etudes sectorielles et preparation du rapport de repercussions sur l'environnement, complexe de la Grande riviere de la Baleine, les conditions de base du milieu humain [Integration of sectorial studies and preparation of the report of environmental consequences, Great Whale River complex, basic conditions of the human environment] / Societe multidisciplinaire d'etudes et de recherches de Montreal Inc. Hydro-Quebec. Direction de l'Environnement [Sponsor]
Montreal : SOMER, 1979
67 p. : ill. : maps ; 28 cm
Available at Hydro-Quebec, Societe de developpement de la Baie James
Text in French

Ce rapport fait la synthese des elements du milieu social susceptibles d'etre affectes par l'amenagement du Complexe Grande Riviere de la Baleine; il sert de preliminaire a un futur rapport de repercussions. Un apercu historique met en evidence l'ancienneté de la presence autochtone sur le territoire, et son processus de sedentarisation suite a l'arrivee des Euro-canadiens; de plus l'organisation communautaire a subi des changements importants suite a la Convention de la Baie James. Au niveau de l'agglomeration de Poste-de-la-Baleine, la dependance vis-a-vis l'exterieur est grande; les 558 Inuit et les 377 Cris forment une population jeune a croissance accelerée, ou les relations inter-ethniques sont passablement pacifiques et ou un sentiment d'identite nait face aux 166 blancs; les problemes de sante, d'education et

de travail sont nombreaux. Au niveau de la zone avoisinante, les autochtones empruntent certains axes de circulation pour atteindre les territoires ou, selon les saisons, ils pratiquent la chasse, la peche, le trappage; on note une forte dependance des Cris a l'egard de la sauvagine et du caribou, alors que la diete des Inuit est faite surtout de mammiferes marins et le caribou. Les revenus tires du trappage sont faibles. Enfin, Poste-de-la Baleine a une importance regionale par les structures mises en place par la Convention, par la distribution de services et par son role dans le reseau de transport. (Au)

Quebec : [s.n.], 1980.
52 p. : ill. ; 28 cm.
ISBN 2-550-00687-9
Available at Hydro Quebec, Societe de developpement de la Baie James, Montreal.
Text in French.

Cette brochure vise a synthetiser le contexte social economique et politique dans lequel se sont formees et developpees les cooperatives autochtones du Nouveau-Quebec. Elle donne d'abord un apercu du Nord Quebecois: sa geographie, sa population, son histoire socio-politique (jusqu'a la signature de la Convention de la Baie James) et son economie (activites et revenus des autochtones). Puis elle tente de cerner le mouvement cooperatif autochtone: son histoire, ses membres, ses activites, son chiffre d'affaires et son impact socio-economique. (Au)

This report discusses the native employment program guidelines approved in 1971 under "The Northern Development Policy 1971-81". The report discusses employment practices, and specifically "compensatory" measures which might assist in providing native people with equal opportunity for employment and advancement. Sections of the report deal with questions of supervision, selection of trainees, human relations and prevention of grievances. (LET)

The meeting in Frobisher Bay was part of a series of workshops organized by the Committee on Northern Population Research under a mandate established in 1977 "to organize workshops, preferably in the North", and to "find a mechanism that would facilitate greater cooperation between researchers, governments, and northern organizations." The variety of papers presented, and the level of discussion during the meeting, reflect both an increasing interest in northern population studies, and the sophisticated level of research underway in areas such as employment and training, the design and implementation of income support programme, and the use of population studies as a working tool for community development and social planning.

La reunion qui s'est tenue a Frobisher Bay faisait partie d'une serie de colloques organises par le Comite de recherche sur les populations nordiques, apres qu'on lui eut confie en 1977 le mandat d'"organiser des colloques dans le Nord, de preference", et "de chercher des moyens de promouvoir une meilleure cooperation entre les organismes du Nord, les chercheurs et les gouvernements". La diversite des sujets et la qualite des discussions refletent a la fois l'interet croissant que suscitent les recherches sur les populations nordiques et la complexite des recherches en

cours, dans des domaines tels que l'emploi et la formation, l'elaboration et la mise en application d'un programme de securite du revenu, et l'utilisation des etudes sur les populations comme outil de travail pour le developpement au niveau des localites et pour la planification sociale. (Au)

This article illustrates the use of northern demographic data as an element of criminological analysis during recent research of adult male correctional institutional needs for the Baffin Region. . . the discussion begins with an overview of the use of demographic data in the measurement of criminality and offender profile. Moreover, the employment of demographic analysis during the above research is demonstrated in the subsequent discussion on the incidence of crime, admissions to NWT correctional institutions, the incarceration of Inuit offenders, and institutional population trends. The article concludes with a discussion on the significance of demographic data in socio-legal policy. (Au)

The Norman Wells Oil Field Development and Pipeline Project will have a direct impact on four communities along the MacKenzie River. . . . With Esso making a special effort to employ residents of the Northwest Territories, some are expected to relocate in Norman Wells or to commute to this center. Thus, changes in residency, occupation and income of such northerners are forecast during the project lifespan. These changes should accelerate the growth of the wage economy in the region, shift local workers from lower paying jobs and part-time employment into full-time high paying jobs and broaden the region's infrastructure. Thus, the Norman Wells Project is expected to create three major changes in this region: (1) To increase the population of Norman Wells. (2) To draw northerners into the wage economy on a full-time basis. (3) To create a major energy base at Norman Wells and an energy corridor in the Central MacKenzie District. . . . This database will serve as the cornerstone of the monitoring programme. . . [which] is an attempt to measure change in certain variables over time. . . (Au)
